Desired position

QA Engineer

QA Automation Engineer with manual testing background and strong teamwork skills. I automate repetitive testing processes and consistently contribute practical improvements to products and workflows. Based in Bečej, Serbia - open to remote roles.

Key skills

Stack: TestRail, Allure, Atlassian, Utrack, Chrome Dev Tools, Postman / Insomnia / Charles, PgAdmin, Git/Gitlab + pipelines, Braze, i18n, Graylog, Jenkins (plus a little customisation experience), Java (Selenium, TestNG, JUnit), Kotlin (Selenide, Kafka), Clickhouse, Postgres, Oracle Database, experiments, mock location, Swagger, Claude agents

Manual

- manual and autotesting, smoke and sanity, regression, business logics testing
- functional and regression testing of the web (backend, API) and mobile (iOS/Android)
- GUI functional and regression testing (desktop)
- test documentation development: test plans, strategies, test cases, checklists

Automation

- Kotlin + Selenide&Backend (Kafka, api, DB)
- development autotest frameworks for a small project (JUnit+TestNG, Selenium+Jenkins)
- support autotests (UI and API)

Work experience — 6+ years

December 2023 —
now

QA engineer (Web)

Responsibilities

- Manual and automation testing for a big project (50+ microservices)
 - wrote autotests for backend in Kotlin (Kafka, API and DB)
 - work close in cooperation with dev and analysts
- After migrating from Mortgage team to Raiffeisen Business team
- Manual and automation testing (30/70 Kotlin+ Selenide) for web project

Key result

- autotest coverage for a big project (connecting to the bank's datalake)
- has achieved the highest quality releases
- change onboarding process in a new team
- Create wiremock service with Claude code

Raiffeisen Bank Russia

Russia <https://www.raiffeisen.ru/>
