

THE MARVEL MULTIVERSE

The Marvel universe contains many different alternate realities. These extra dimensions often have alternate versions of the characters (one world has a six armed Spider-Man, one has Gwen Stacy as a Spider-Woman, etc.). The universe that the mainstream comic book world exists in is number 616. There are universes populated by zombies, animals, and the movies even have their own Earth number.

What you will do for this assignment is find the number for an alternate reality. You will put that number in the chart below (in numerical order with the others, please) in the first column. In the second column, you will write what makes this world different for the normal 616 (What is different about some of the characters?). The more you write in this box, the better your grade will be. In the third column, find an image of one or more of these characters (you may need to shrink the image so that it doesn't distort the chart width). Write the MLA that you got this information from in the fourth column. In the last column, write your name. When you are done, you may wish to email me so that I can grade it. Grades will be put below the name.

Grading:

- The first four of these that you do will count as a daily grade each.
- The next four will count as quiz grades.
- The ninth and tenth one will each count as a test grade.

Some universe numbers have been added, but not all of them. If you research a different universe number than what is already on the chart, just add it in.

Look at 616 and 8311 for an example.

The world of Earth-311 is much as it was in the year 1602 on [Earth-616](#). Political powers include [England](#), [Scotland](#), the Catholic Church centered on [Rome](#), and [Latveria](#). Latveria was ruled by [Count Otto von Doom](#), who was called "the Handsome" and intended to rule the world. England was ruled at first by [Elizabeth I](#), and later by James VI of Scotland following Elizabeth's assassination by Doom's minions (a year earlier than her death in the real world). The Roanoke Colony in America also declared its independence from Britain after many super-powered individuals fled persecution under James I.

[Mutants](#) exist, but they are most commonly referred to as the "[witchbreed](#)" (also called "mutantur", Latin for "changing ones"). The Catholic Church, as well as devout Protestants such as James VI, considered the witchbreed to be devil-worshippers and hunted them down. The Inquisitor [Enrique](#), himself a witchbreed, allowed witchbreed to survive if they could pass as human so that they could

	eventually join his "Brotherhood of Those Who Will Inherit The Earth". Elizabeth I also allowed witchbreed to live in England, where they were taught at Carlos Javier's Select School for Sons of Gentlefolk. James VI's first act after Elizabeth's death was to round up and imprison all of Javier's students, forcing them to escape to America.

616	This is Marvel's main world. It began with <i>Marvel Comics #1</i> (although some would claim it started with <i>Motion Picture Funnies Weekly</i>) with the appearance of Submariner and it is the universe that Stan Lee made popular with Spider-Man, the Fantastic Four, and the Avengers. It does not include the movies, cartoons, or TV shows. Writer Dave Thorpe is the first one to use this number (which is based off of the release date of <i>The Fantastic Four</i>		"Earth 616." <i>Wikipedia</i>. Wikimedia Foundation, 15 Sept. 2014.
