

## Woods II Progress Assignment

This is a picture of what my finished project should look like. It will not have a back or armrests on top; instead, it will be one large pad of softer material.

I have decided to make a toy box that also doubles as a bench. So far, I only have the inside frame and outer frame of the panels cut to size and ready for additions. I have had to use the table saw, jointer, miter saw, planer, and router machines to get the boards ready for assembly.
