2026 Adobe Creative Cloud License Renewal

1. Download the AdobeRenewMac folder from our email link and burn to a blank cd.
2. Quit all open applications & logout of Phojo. Login as MediaAdmin.
3. Copy the AdobeRenewMac folder from CD to the desktop
4. Right click on RenewAdobeMac.sh and open with Terminal.

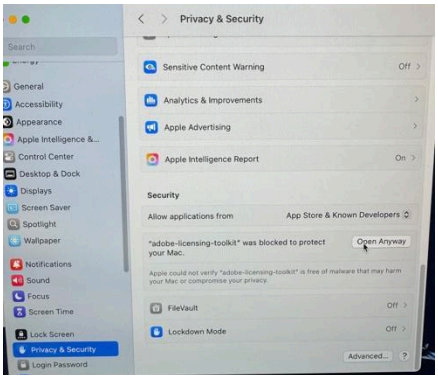

If you get a security warning about it not being a trusted app you will need to grant it permission to run. If not type in the MediaAdmin password and press return - Then skip to step 5 below.

Click Done then Right click on adobe-licensing-toolkit from inside of the AdobeRenewMac folder and click Open –Click Open anyway.

If you are running MacOS 13 or newer you will need to open Apple- System Settings – Privacy, scroll to bottom and click Open anyways.

Give the toolkit permission to open by entering the MediaAdmin password. Also allow it to access files on the desktop if prompted.

After permission has been granted run Step 4 again.

5. Make sure your System Clock & Date/Year are set correctly –Reboot workstation, login as Phojo, then open any of your Adobe CC applications. They should now all be fully licensed.

If you have any issues email Help@AMMPS.us
