Yes No

List other project members:

Name	University\Organization	Email

Project Narrative

Describe your project in the following sections. Please adhere to word count maximums, or your application will not be considered.

Project Abstract (200 Words Maximum)

Project Background (1000 Words Maximum)

Describe what motivates or justifies your project, including any relevant past research.

Project Design (1000 Words Maximum)

Describe your experimental design (e.g., the treatment, conditions, outcome measurement, and any moderators or mediators).

Power Analysis (500 Words Maximum)

Describe how many cases your experiment will need and explain how you came to this number.

Instrument

- 1) List all of the survey questions — *including response categories and any introductory material*— that you want to include in your project. Please see the Frequently Asked Questions section of the SESSR website for the list of variables that all projects will receive automatically.
- 2) If you are going to include a vignette, images, or video, please describe in detail here along with word counts or time lengths, as relevant.

By submitting this proposal, you acknowledge and agree to the following:

1. If this project is supported, I will receive exclusive access to my data for 12 months after receipt. After that, the data will be publicly archived and available to all.
2. If this project is supported, I will be required to preregister this study on the Open Science Framework before my data collection is approved.
3. If this project is supported, I will be required to submit preprints of results\manuscripts to the Open Science Framework.
4. If this project is supported, I will be required to acknowledge and cite SESSR as instructed in any outputs produced from the project.
5. If this project is supported, I will be required to participate in a virtual conference to present findings from this project.
