

Translation Project Manager (PM) Evaluation R2

Brandon received translations for the Lume flyer from the three project managers. After reviewing the quality, he identified issues with each translation and contacted the respective Translation Project Managers (PMs) to address these concerns.

Unknown to Brandon, the three PMs represent different backgrounds:

- A. A highly experienced Translation Project Manager
- B. An inexperienced high-school student trained for 2 weeks to become a PM
- C. A ChatGPT agent, prompted to simulate a project manager

Please study the mail exchange between Brandon and the three PMs, numbered PM1, PM2 and PM3. Look at each of the three mail exchanges ([here](#)). Assess how well each PM follows the industry best-practice. Associate each mail exchange to a category (A, B, or C). Address the questions in this Form, [Translation Project Manager Evaluation R2](#), which asks you to:

- Quantitatively and qualitatively measure how well each PM follows industry best-practice (e.g. ASTM F2575-14) in their e-mail interactions.
- Associate each mail exchange to a category (A: expert, B: novice, or C: ChatGPT), and give the reasons for your decision.
