# **TCSD K-5 Literacy Block Guidance**

# What is **Tight** (expected TCSD Wide)?

# What is **Loose** (Building/PLC dependent)?

#### **Curricular resources:**

 Wyoming Content and Performance Standards: The content with which all teachers instruct is defined by <u>The Wyoming</u> Content and Performance Standards.

## • Primary Resource:

- Wonders/Maravillas is the primary resource for TCSD. The core components are used including the genre study and anchor texts, foundational skills scope and sequence, and writing.
- Intervention Resources: Selected by MTSS team from TCSD Tier III Intervention Inventory

## Instructional approaches:

- Minimum 90 minutes of literacy instruction
   K-2 120, 3-5 90-120
- Core 7 of ComprehensiveLiteracy Instruction:
  - Oral language, phonological awareness, phonics, comprehension, fluency, vocabulary, and writing.

Structured literacy is a comprehensive, explicit, and systematic approach to teaching reading and writing that emphasizes the direct instruction of the foundational skills needed for proficient literacy. It focuses on the systematic teaching of: Phonology (the sound structure of language), Sound-symbol correspondence (phonics), Syllable instruction, **Morphology** (the study of word parts like prefixes, suffixes, and roots), **Syntax** (sentence structure), and Semantics (meaning). Structured literacy is especially effective for students with dyslexia or other reading difficulties because it breaks down language into its components and teaches them in a clear, sequential way. It contrasts with less explicit approaches by ensuring that all learners receive thorough and cumulative instruction in how language works to build decoding, encoding, and comprehension skills, (Moats & Tolman, 2001).

## **Assessment:**

 Our district assessment system includes: Universal screener, Common formative assessments, and common district assessments.

### **Curricular resources:**

- Supplementary Resources:
  - LETRS/Aspire instructional materials,
     PowerHour, OG Comprehensive and
     Morphology Plus, Writing Revolution,

# Instructional approaches:

- Instructional apps: Lexia Core 5, Imagine Learning, Wonders digital dashboard
- Instructional contexts: TI- whole group, small group, independent, TII contexts
- Text selection for small group instruction: decodables, Wonders leveled readers, Wonders paired read, trade books, book room text sets.

#### **Assessment:**

• PLCs determine assessment pacing, delivery, and frequency for each unit of instruction.

	Core components and time allotment recommendations:
High quality literacy instruction Look-fors	<ul> <li>All students are engaged in all domains of language and literacy (reading, writing, speaking, listening, and viewing) every day.</li> <li>Teachers utilize both whole group and small group instruction within the daily literacy block.</li> <li>Teachers use collaborative structures (think/pair/share, partner work, etc.) to provide opportunities for oral language development and deeper learning.</li> <li>Teachers plan instruction with grade level colleagues using assessment data.</li> <li>Teachers engage in backward planning in order to determine the strengths and weaknesses of the upcoming unit.</li> </ul>
Whole Group Instruction (30-60 minutes)	<ul> <li>In a whole group shared text experience, teachers use Wonders/Maravillas texts with students. (Note: Teachers may choose to supplement with additional texts, but should not supplant texts from Wonders/Maravillas).</li> <li>All students have access to grade level, core texts, with scaffolds provided as needed.</li> <li>Whole group instruction emphasized the core 7 components of comprehensive literacy instruction (comprehension, fluency, vocabulary, etc).</li> </ul>
Small Group Instruction (30-45 minutes)	<ul> <li>Students interact with texts for a specific purpose (guided practice in decodable or grade level texts, knowledge building, etc.).</li> <li>Targeted small group instruction (e.g., strategy groups for comprehension, vocabulary, fluency, foundational skills, in the context of reading, writing, and skill building.</li> <li>Texts used during small group instruction may include decodables, leveled texts, and grade level texts.</li> </ul>
Independent practice (15-30 minutes)	☐ Students who aren't working with the teacher in a small group are working on quality independent activities aligned to priority standards and skills.
Foundational Skills Instruction (25-40 minutes)	<ul> <li>When working with students on foundational skills, teachers are using the Wonders/Maravillas resource as the primary resource and supplementing only if/when needed.</li> <li>Teachers follow the Wonders/Maravillas scope and sequence, but prioritize certain aspects of the Wonders/Maravillas foundational skills scope and sequence based on assessment data and student needs.</li> <li>On average, K-2 teachers should allocate 40 minutes per day to foundational skills instruction.</li> <li>Core components include: phonological awareness, phonics and spelling, morphology, syntax, and foundational writing skills.</li> <li>On average, 3-5 teachers should allocate 25 minutes per day to word study and grammar instruction. Core components include: phonics, spelling, morphology, grammar and syntax, and foundational writing skills.</li> </ul>
Assessment (PLC determined)	<ul> <li>The teacher introduces and students know their learning goals and desired student outcomes</li> <li>Teachers preview the common assessment before starting the unit to determine where students are headed.</li> <li>At some point in the literacy block, the teacher collects formative assessment data to track students progress towards essential standard or skill.</li> </ul>
