

HELPING CURE CANCER CLUB

Our club's mission is to support cancer patients, hold fundraisers, and learn more about cancer and the treatment process. We will support patients at Boston Children's Hospital firsthand with the hope of improving their difficult journey and being a positive influence on not only the patients but the club members as well. We will also create and host fundraising events where all proceeds will go toward cancer research. Additionally, we will be meeting with doctors and professionals who work with cancer patients in order to learn more about current events and issues.
