

#clmooc Tech Tools

As a participant in the Educator Innovator “Making Learning Connected Massive Open Online Collaboration” (or, as it’s known on Twitter, #clmooc), I’m continually amazed at all the new technology tools people are using for their makes. I decided to track them on this Google Doc. Please add to the list!

- [Webmaker](#): Mozilla’s remix tools (X-Ray Goggles web examiner, Thimble html editor, Popcorn Maker video annotation) deserve the first place. #teachtheweb #ftw
- [Canva](#): Amazingly simple graphic design
- [Wordfoto](#): iOS app for picture-based word clouds
- [Vialogues](#): Dialogue-creating tool for videos
- [Haiku Deck](#): Simple, beautiful presentation software
- [ThingLink](#): Picture-annotating website
- [HackPad](#): Easy & quick collaboration site
- [Flipagram](#): Short video creation app for iOS and Android
- [Tapestry](#): Story making tool for mobile devices
- [Twine](#): Interactive prose storytelling tool (here’s a [great tutorial](#))
- [Symbaloo](#): Content j using icons (CLMOOC14 [Webmix](#))
- [Pathbrite](#): Digital portfolio and learning platform
- [Piktochart](#): Easy way to make Infographic (i.e. charts, posters, etc.)
- [Voicethread](#) - Share presentations and images and allow for peer feedback
- [Scoop](#): Easy way to curate materials and create lessons
- [Adobe Voice](#): Digital storytelling app (free)
- [Bitstrips for Schools](#): making webcomics
- [Draw.io](#) -- for flowchart construction
- [Flipboard](#) -- a curation tool that puts shared sites into a magazine format (better as an app than as a website) -- allows for collaborative curation, too
- [Make a Gif](#) -- for creating animated GIF files from YouTube Videos
- [EZGif](#) - for layering text on top of animated GIF files
- [Online Image Editor](#) - Another editor that allows adding text to animated gifs
- [Slides](#) -- allows for a cube-like presentation surface
- [MemeCrunch](#) -- meme generator
- [MemeCreator](#) -- another meme creator
- [Gamestar Mechanic](#) -- for making video games
- [Notegrphy](#) -- adding a visual element to your writing
- [Jeopardy Labs](#) -- Build and share your own Jeopardy game
- [InkleWriter](#) -- another web-based site for constructing interactive fiction
- [Google Story Builder](#) -- make a dialogue story
- [Sploder](#) -- online video game creator
- <http://tackk.com/> Create streams people can add media/text; works also with Edmodo [

[add to this stream](#) of teaching ideas from #clmooc]

- [Visual Poetry](#) -- Make your poems more visual, with design elements
- [GlowDoodle](#) -- interactive light video thing
- <http://artpad.art.com> - online drawing and painting that records as you work
- [GlowTxt](#) -- makes animated text
- [AudioPaint](#) -- takes images and converts them into sound files (I know, what?)
- [Genius](#) -- allows you to annotate text with multimedia -- variations include Poetry Genius, etc.
- [Five Card Flickr](#) -- random visual storytelling with images
- [StoryBird](#) -- picture book creator
- [Steller](#) -- App for digital story creation
- [Storehouse](#) -- App for digital stories -- beautiful design elements
- [PicMonkey](#) -- website that doesn't require any apps or downloads to create image collages
- [QuotesCover](#) -- makes visual display of quotes and sayings
- [Error Message Generator](#) -- for fun and political poking
- [BeatLab](#) - easy music-making website.
- [Smore](#)- Flyer and newsletter generator; design shareable internet flyers that can be edited on the fly
- Screencastify: Chrome app: <https://www.youtube.com/watch?v=K2Aawlis2Lk>
-
- [Hypothes.is](#) Web page annotation tool. Also available as a Chrome bookmarklet
- [List of word cloud generators](#)
- [TwistedWave](#): free audio editor
- [Padlet](#):
- [Plotagon](#) Video software
- [Soundtrap](#) Collaborative music making software
- [Soundcloud](#) Audio upload platform
- [Funny photo maker](#)
- [Kizoa Video Maker](#) - Easy, free slideshow/video collage tool that uploads simply to YouTube.
- [What I really](#) what I really meme generator
- [Super.me](#) app (Android and IOS) to quickly add text to an image and share as a web page.
- [MindMeister](#): Create, collaborate, embed, connect interactive mindmaps

Michael Weller kindly pulled this list together after a Make With Me session (re:light)
