Junior Engineer

JOB TITLE	Junior Engineer
DATE	2022
LOCATION	New Jersey
DIRECT REPORTS	Senior Engineer
DURATION	1-2 Years

Local Unit & Position Description:

Seeking technical support and engineering for our emerging commercial and industrial energy efficiency incentive program portfolio in New Jersey. This role requires a motivated professional with technical acumen and excellent customer service skills.

Tasks May Include:

- Review and verify technical merits of business customer energy efficiency applications, including calculation of energy savings and verification of equipment specifications
- Interact with customers to address questions or concerns about the installed equipment or program information
- Conduct customer site inspections to verify the installation of energy efficient equipment
- Prepare and review technical specifications and engineering calculations for commercial and industrial energy efficiency projects
- Coordinate with other team members and clients to develop strategies to influence the market and increase participation in programs

Position Qualifications:

What We're Seeking:

- Bachelor’s degree in engineering required. An educational emphasis on energy and/or energy experience is strongly preferred
- Demonstrated knowledge of lighting, motors, and HVAC systems
- Knowledge of ASHRAE standards
- Word and PowerPoint knowledge required
- Advanced level Excel skills required
- Excellent written and oral English communication skills for customer communication required
- Display a positive, team-oriented attitude to match our friendly work environment
- Must be able to meet the requirements to drive for company business
- Willingness and ability to travel, primarily by car throughout the NJ service territory approximately 15% of the time
- Position will require onsite inspections and walking of the customer’s locations. Some light climbing
- Reliable transportation required

Desired Qualifications:

- Knowledge of energy efficiency program implementation or energy related markets
- Knowledge of energy management in a commercial or industrial setting
- Commitment to a continuous improvement environment

Immigration-related benefits (for example, visa sponsorship) are not available for this position
