COURSE: MUSIC PRODUCTION / BEATMAKING

SOFTWARE: ABLETON or LOGIC PRO.

Our Music Production course gives our students a thorough grounding in essential music production skills using Ableton Live/Logic Pro.

If you are serious about becoming a professional producer or sound engineer, then it is crucial to master these skills before you can progress further. It's perfect for beginners, but even if you have been making music for some time, you will benefit from learning from a professional producer.

Some of the skills you will learn are:

- Introduction to **Ableton Live**
- **MIDI & Audio** Tracks manipulation
- How to incorporate **Melody & Harmony**
- **Organization** skills
- **Audio Effects** (Reverb, Delay, etc)
- How to use **Ableton Push** and other **MIDI** controllers.
- **Sampling**
- How to **Record Vocals** and **Vocal Manipulation**.
- **Sound Design**
- **Track Arrangement**
- **Automation**
- Introduction to **Music theory**
- Introduction to **Mixing / Mastering**

COURSE: MUSIC THEORY

This course shifts the focus from the technical to the musical elements

within your track. Even if you don't make music with lyrics, you still need to understand how tracks are structured in order to elevate your music above that of your competitors; it is crucial to have an understanding of music theory, composition, and arrangement techniques to be able to create competitive level music and communicate with other musicians.

Among the topics you will learn are:

- How to create **Melodies** and **Riffs**
- How to **Harmonize**
- How to understand **Chords and Progressions**
- **Time Signatures** and **Rhythm**
- How to create **Basslines**
- **Structure & Arrangement**
- How to create **Verses, Hooks, Etc**
- Creative Tactics & Workflow

COURSE: RECORDING / STUDIO VOCAL PRODUCTION

This course is a deep dive into professional vocal production techniques to help get your best performances onto your tracks. Build on your music production knowledge by exploring specialized vocal methods and recording techniques. To create a polished professional vocal performance we'll look at timing and pitch correction. Through collaboration you'll develop communication and editing skills to get great takes and learn how to process your vocals to put them right where you want them in the mix.

By the end of the course, you will learn the following skills:

- Vocal Microphones and Preamps
- Vocal Recording Techniques
- Comping and looping
- Vocal EQ & Dynamic Processing
- FX for Voice
- Compression and Processing
- Editing Techniques
- Creative and Corrective Auto-Tuning

- Correcting Vocal Timing and Syncing
- Background Vocals (BVs)
- Studio Performance Techniques
- Ad Libs
- Communication and getting the best out of the performer

CAREER OPPORTUNITIES
