

Doubles in a Row

- Spin the spinner using a pencil tip and paper clip. Tell what doubles fact you used to help you solve your problem. Place the answer anywhere in your row.
- Player 2 spins the spinner and does the same. Continue playing. Answers need to be in order, with the largest sum to the right.
- You can only use each number once. If you cannot place your sum, then skip your turn.
- The person to win is the first person to fill up their row.

Player 1
