

Privacy Policy for IRCTC Fast Booking Assistant

Last Updated: September 12, 2026

1. Overview

IRCTC Fast Booking Assistant is a browser automation extension developed to assist individual users in streamlining repetitive data entry tasks on the official IRCTC web portal. We respect user privacy and adhere strictly to a local-only data handling model.

2. Data Collection and Usage

- **No Remote Data Collection:** The extension does not collect, transmit, track, or share any personal information, browsing history, or payment details with any external server or third-party service.
- **Local Storage Only:** All preferences entered by the user (such as origin station, destination station, travel dates, passenger names, age, berth preferences, and local login credentials) are saved exclusively on the user's local machine using the browser's `chrome.storage.local` API.
- **No Telemetry or Analytics:** The extension does not embed tracking scripts, analytics libraries, or third-party advertising identifiers.

3. Permissions and Use Justification

- **Host Permission (`irctc.co.in`):** Required solely to interact with the DOM of the official ticketing portal to autofill saved fields and automate navigation steps.
- **Storage (`storage`):** Required solely to keep form settings locally available across browser sessions on the user's device.

4. Data Security

Because all data remains strictly in the user's local browser sandbox, no external transmission occurs. Users can clear all stored values at any time by clearing the extension storage or uninstalling the extension.

5. Changes to This Policy

Any future updates to this policy will be reflected on this page.

6. Contact Us

For any questions regarding this Privacy Policy or the extension, contact the publisher at:
