Immediately stop consuming fear based programming from the mainstream media/pop culture. If you vibrate on fear it will make things worse.

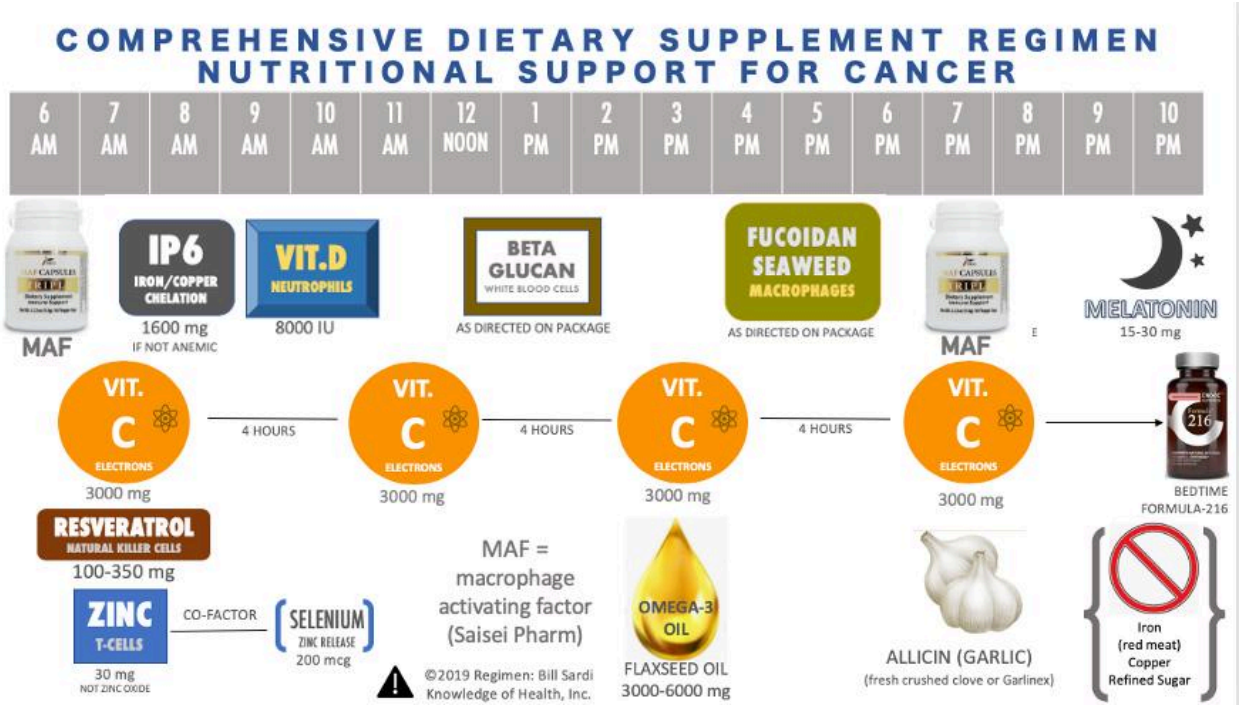

To help boost DNA repair, support methylation & glutathione production/immune system —> Chop fresh garlic (allicin) and let it sit for 5 mins then cook on low heat with olive oil, chop fresh broccoli/cruciferous veggies (sulforaphane) then let sit for 40 mins then steam for 2-3 mins, or eat raw broccoli sprouts with mustard:
https://youtu.be/f0xo-HChDZ4?si=BAV9AxoX9s585xXw
https://youtu.be/U4OoLaNlrgc?si=cizjzPLE3oRNOk6g

Lifestyle changes: Intermittent fasting (only eat from 12-6 each day) + a few 72 hr water only fasts + a round or two of Candida cleanse (see this Amazon list) + Keto diet (low in red meat

with lots of fermented veggies (kimchi, kraut, etc.)) + 500 mg/day of Chelated Magnesium. The Candida cleanse alone could be enough to kill the root cause of the cancer and allow for recovery, if not then implement the following supplement schedule each day:

Other considerations:
Candida cleanse, heavy metal detox, Dimethylglycine (DMG), fenbendazole + vit E, ivermectin, black seed oil, CBD oil, boron supplements, glutathione, humic/fulvic acid (trace minerals), C60, probiotics, circulation/Nitric Oxide boosters, antineoplaston (Dr. Burzynski)
==========
Boron:
https://pforlife.com/borax-conspiracy.html

to treat Candida. There is much interesting information on an Earth Clinic forum called Borax Cures (10). With low to medium-weight people use 1/8 teaspoon of borax powder and with heavier weight 1/4 teaspoon per liter of water. One drinks the water spaced out during the day, and does this for 4 or 5 days a week as long as required.

[57] **ABSTRACT**

A method for moderating the rate of cellular mitosis in a living mammalian tissue having a pathologically elevated rate of cellular mitosis sensitive to treatment with a solution below which comprises perfusing said tissue under mitotic growth conditions with a safe and effective amount and concentration of a composition consisting essentially of a) inositol hexaphosphate or a physiologically acceptable salt thereof; and b) a source of inositol or a physiologically acceptable salt thereof, for a period of time sufficient to moderate the elevated rate of cellular mitosis to a normal, non-pathological rate for said tissue. The method is useful in human and mammalian diseases wherein NK cell activity is altered in the laboratory, e.g. tumors, other cancers including leukemia, immunosuppressed individuals (AIDS and transplant recipients), and in viral, fungal or protozoal infections.

Dr. Max Gerson / Gerson Therapy - https://gerson.org/

List of 90 Cancer Cures & Protocols - tons of helpful info, supplements, research (you'll see a lot of the same supplements and protocols recommended over and over in your research) - https://revealingfraud.com/2020/08/health/90-cancer-cures/

Keto diet (remove all sugar from diet, and include intermittent fasting). Cancer is a fungus / yeast (candida) which feeds on sugar and thrives in an acidic environment. Cancer can't survive in an alkaline environment. Cancer can ONLY burn sugar/glucose, and without glucose cancer cells die after 6-8 wks. Therefore eliminating carbohydrates and eating mainly proteins and fats is effective. Fasting helps too by allowing autophagy by which the body removes unnecessary or dysfunctional (cancer) cells.

http://www.healingcancernaturally.com/mms-chlorine-dioxide-treatment.html
https://jimhumble.co/how-to-make-mms
https://www.alternative-cancer-care.com/mms-cancer.html

https://rumble.com/c/c-537305
The channel is called The Universal Antidote. It's about MMS (aka Chlorine Dioxide).
This is a documentary about MMS: https://rumble.com/vdey7t-the-universal-antidote.html
Here's the guy who did research and helped people know about this stuff: https://jimhumble.co/
His first edition of his book is available for free as a pdf on that website, but you should invest in the REVISED EDITION (there's a bookstore link on the website where you can order it) because it's updated with the latest information.
Like HCQ, ivermectin, and fenbendazole, chlorine dioxide is anti-parasitic, but it's more than that. The book explains in detail how it works. It's safe for pregnant women and children. It's the same stuff that is used to purify water in many municipal water systems.
There's also a telegram channel and chat where lots of people put up information about the protocols that have worked for them.
The Telegram channel is t.me/theuniversalantidote . There's a start-here post that has the documentary as well as a 23-page training guidebook and there are also training videos.

(57) **ABSTRACT**

Mebendazole is an antiparasitic drug with over 40 years of safe use. Recently mebendazole was repurposed for glioblastoma therapy. Three polymorphs of mebendazole exist, but the relative polymorph content for existing drugs varies, and the therapeutic anti-cancer relevance of the different polymorphs was unknown. As an oral drug mebendazole polymorph C is a superior form, and it reaches the brain and brain tumors in effective concentrations. Efficacy is further improved by combining mebendazole with a P-glycoprotein inhibitor. Mebendazole may also be used for therapy of other cancers, as well as a chemo-preventative agent.

HOW TO PREVENT CANCER: THE BASICS

- Tackle insulin resistance
- Quit smoking
- Limit alcohol
- Get enough Vitamin D
- Avoid processed foods
- Avoid sugary drinks and pure fruit juice
- Get enough exercise (aerobic and resistance training)
- Reduce stress
- Get at least 8 hours of quality sleep

FLCCC ALLIANCE

HOW TO PREVENT CANCER: VITAMINS AND NUTRIENTS

- Vitamin D3: 5,000 IU daily (adjusted according to baseline levels)
- Omega-3 fatty acids: 2-4 g daily
- Green tea catechins: 500-1,000 mg daily
- Melatonin: 0.75-5 mg (slow release) nightly
- Metformin: 250 mg-2,000 mg daily

TOP 18 CANCER INTERVENTIONS
