10. Financial Planning
 - A. Take your sales projections from section 5.D&E above.
 - B. What are your costs?
 - C. Profit and Loss statement
 - 1) Many business owners think of the 12-month profit and loss projection as the centerpiece of their plan. This is where you put it all together in numbers and get an idea of what it will take to make a profit and be successful.
 - 2) Projections should be accompanied by a narrative explaining the major assumptions used to estimate company income and expenses.
 - 3) Research Notes: Keep careful notes on your research and assumptions, so that you can explain them later if necessary, and also so that you can go back to your sources when it's time to revise your plan.
 - D. Projected Cash Flow: If the profit projection is the heart of your business plan, cash flow is the blood. Businesses fail because they can't pay their bills. Every part of your business plan is important, but it means nothing if you run out of cash.
 - E. Will you be able to live on the net profit?
