

Alexandr Digilevich

FULLSTACK ASP.NET DEVELOPER

+375 44 5933637 | digilevich.alexandr@gmail.com | @alexandr_zelyoniy

I am a fullstack ASP.NET developer with 9 years of experience. I have experience in both front-end and back-end development. I have been working with some different front-end frameworks. I am a quick learner and have a keen eye for detail. I am also a team player and have excellent communication skills.

SKILLS

Backend: Asp.Net Core MVC, Web API, REST API, Docker, RabbitMQ, SignalR, Azure Services, ElastiCache, ElasticSearch

CI/CD tools: Git, Jira, Azure DevOps, Github Actions, AWS

Programming: C#, Design patterns, SOLID, MS Test/XUnit, Selenium, XML, ACID, Event sourcing, ML.NET

Frontend: JavaScript, TypeScript, Blazor, Razor pages, Kendo UI, Angular, Knockout, React, Bootstrap, JQuery, Ajax, HTML, CSS, Vue.js, Node.js

Database: MS SQL Server, PostgreSQL, MongoDB, Redis, CosmosDB

Methodology: Agile/Scrum, Kanban

Logs/Metrics: ELK, Sentry, Prometheus, Grafana alerts

AI Agents: ChatGPT, Copilot, Gemini, DeepSeek, Qwen and etc, Cursor IDE

EXPERIENCE

Full stack developer, Interfarmax 2022 June – 2025 October

- Developed and supported .NET services (web and desktop) within corporate systems.
- Implemented new modules for automating business processes, optimized existing code, ensured stable integration between components via RabbitMQ and databases (MS SQL/PostgreSQL).
- Participated in architectural decisions and improvement of CI/CD processes.

Full stack developer, Digteum 2020 June – 2022 June

- Participated in the refinement of a distributed application (ASP.NET 6, Docker, RabbitMQ, MS SQL): integration of the payment system and address validation allowed us to reduce the number of errors in orders by 40%.
- Updated the client functionality on Knockout.js, increasing the convenience of the interface when entering data.

Full stack developer, Nextsoft 2018 January – 2020 April

- Developed a web application on a microservice architecture using ASP.NET Core Web API.
- Implemented service interaction via RabbitMQ, integration with PostgreSQL, and also participated in the refinement of the frontend on Angular.
- Ensured stable operation of key APIs and reduced the system response time by 30%.

Full Stack Developer, EPAM Systems 2016 December – 2018 November

- Developed a web application for an oncology center on ASP.NET MVC: maintaining patient data, registering appointments, generating reports.
- Integration with MS SQL and an internal authentication system.
- The project was successfully completed, the contract was closed upon completion of all stages of implementation.

EDUCATION

Bachelor's Degree – Computers, systems and networks 2016 – 2021

Belarusian State University of Informatics and Radioelectronics

Relevant Course works

Algorithmization and programming, software design and programming languages, databases, information security basics, system software, software development and testing technologies, storage systems.

LANGUAGES

English, Hebrew, Russian
