

Best Nude Lipsticks For Every Skin Demand | Feelunique

You can never go wrong with a nude lip. From weekend to work, this one is the multi-tasker that keeps on giving. The key is finding the best nude lipsticks and shades for your skin tone to make sure your nude isn't on the wrong side of the trend ie. no concealer lips. Take a look at our [lipstick category](#) and read on to find the best one for you...

For lighter skin tones, think pink. You want to warm up your complexion so go for nudes with a pinky undertone. If you're in the medium range, it's best to opt for a caramel or a berry nude. Avoid pink undertones as this will wash out your complexion. Dark skin tones look great with milk and dark chocolate nudes. A glossy formula will also add definition.
