ANNOUNCEMENTS

HEALTH MINISTRIES

Immunity Boosting Tips

- 1) Studies show that people who don't get enough sleep especially before midnight are more likely to get sick after being exposed to a virus.
- 2) Eating or drinking too much sugar curbs immune system cells that attack bacteria.
- 3) Drinking water allows your eyes and mouth to repel dirt, dust and parasites that might cause infection.
- 4) Vitamins C & D, Zinc, and Elderberry, found in fresh food or supplements have immunity boosting properties.
- 5) Hydrotherapy when indicated, works to increase blood circulation, and movement of immune cells through the body.
