

## **Operation Desert Boot**

### **1. Situation**

Takistan has been going through some radical shifts with a great insurgent uprising a few months ago. Large parts of the Takistan countryside are now controlled by the insurgent forces. A number of suicide bombings and IED strikes have occurred all across Takistan as such the Takistan President Umar Rahimi has requested assistance. The Province Capital of Zargabad has been particularly affected as the Takistan military has been pushed back into the city where they now hold a defensive position.

The UK responded to the President's request for assistance and is deploying its QRF force from Cyprus, the 6th Airborne Division. The 6th AB will help the Takistan military in locating and destroying any IED factories and insurgent camps in the region.

The Takistan military has informed us there is a pro-government militia also operating in the region. Whilst this force is fighting against the insurgents they should be dealt with carefully as they are not an official fighting force.

The Takistan government recommends starting at a cannabis farm in the South located at Shazbah, this location has been a hive for Insurgent activity. Using whatever assets you have available try to locate and identify any IED factories or insurgent camps.
