

Hello everyone,

My name is Lucie Tremblay. I will be your new *orthopédagogue* for the English sector, working in the *Complementary educational national services (also known as SEC)*, in collaboration with the Équipe-Choc and the *Récit*.

### **Work experience**

Although I am new to the English sector, I have many years of experience teaching and supporting adults in their pedagogical path. I first started my teaching career in the youth sector, guiding students through a work-oriented training path. A few years later, I discovered the richness of the adult sector.

I spent 10 years teaching in the Social Integration program/AGE, I also taught French as mother language, CCBE Math, and various workshops related to personal well-being. I then moved to the Eastern Township, where I became *orthopédagogue* in an adult education center. I was asked to support the pedagogical team involved in the success of the students in both AGE and VT sectors.

**Examples of situations where I can support teachers, pedagogical consultants, school administrators or any members of the Complementary educational services.**

#### **Dimension 1: Learning support services**

- Assistance in helping students improve organisational skills for in and outside de classroom.
- Support in helping students with learning challenges.
- Guidance in adaptation measures

#### **Dimension 2: Promotion and prevention services**

- Help with techniques and strategies for better self regulation.
- Sharing best practices related to supporting students in vulnerable situations.

#### **Dimension 3: Student life services**

- Supporting teams in creating a healthy and safe learning environment for students to promote their success.

### **Vision of my work**

Working together as a team, in a creative and collaborative spirit, to find to best way to support the academic success of our adult students. Always keeping in mind their social context, personal issues and learning challenges.

I am thrilled to be part of your community and I look forward to our future collaboration.
