

THE EVOLUTION OF HUMAN MENTORSHIP IN OUR UNPRECEDENTED GLOBAL AGE©

Ashok Gangadean, Margaret Gest Professor of Global Philosophy

Our Human Family has been in the midst of an ongoing and deep existential evolution in our Human Enterprise, and we have now entered an unprecedented Global Age calling for an urgent maturation of what it means to be Human. Over the past 2,500+ years on a planetary scale in the context of First Philosophy, our perennial quest to gain deeper intimacy with What-is-First, our amazing diversity of Elders, First Responders, Wisdom Teachings have pioneered creative pathways to the Source of all Life and Existence.

Whether we “name” this Infinite Source as Being, Reality, Logos, Sophia, Yahweh, Allah, Brahman, Tao, Buddha Nature, to mention a select few, there is latent consensus that the Source of all Life and Existence must be boundless and infinite. Certain revered Elders such as Moses, Jesus, Buddha, Krishna, Mohamed, Socrates, and other eminent First Responders sought to pioneer pathways for our human family to gain access our Original and Highest Human Form, our Mindful and Awakened Self which flows in communion with Primary Being or Infinite Presence.

However, through the centuries of our Human Enterprise as we emerged in an unprecedented Global Age it became clear that our great First Teachings, Enlightenment and Wisdom narratives, our Sacred Scriptures and Religious forms of life remained rather “localized” and in scattered “silos” each alleging to present an absolute and universal teaching for our human family. Is there Common Ground or Consensus across and between our diverse First Narratives and diverse Mentors of what it means to be “Human” and what it means to emerge as evolved Persons in our Global Age?

Entering a Global Age dilates a new and uncharted Evolutionary Frontier wherein our widely diverse First Narratives and First Responders, our revered Mentors and Models of our Human Genome, encounter and face each other in the open horizon of this Global Commons. In our exploration I shall focus on findings of Global First Philosophy which makes clear that What-is-First is the Source of all lives, all narratives, all beings, all cultures and worlds, and thus binding on all humans. In this context of Global First Philosophy Infinite Source is Infinite Presence and Infinitely Unum. Global Ontology reveals how and why any and all First Narratives co-arise from this Infinite Source which deepens our Human Enterprise in our Global Age.

Here it becomes clear that the most urgent onto-medical challenge facing our Human Family is to mind our “minding” and tend with highest priority to a more evolved human technology that opens deeper access to ((Infinite Presence)). What is the hitherto missing ((code)) or mind operating ((process)) that overcomes the patterns of existential fragmentation and opens evolved human literacy for cultures of Deep Dialogue, Human individual and collective

Flourishing in our Global Age? Do we have Global Mentors and evolved Elders of Source Life and Infinite Presence?
