- Tania Schlatter (IQSS)
- Jim Myers (QDR)
- Pete Meyer (HMS)
- Courtney Mumma (TDL)
- Amber Leahey (SP)
- Sunil Manikonda (SP)
- Paul Boon (DANS)

Notes

- #dataverse2019 Updates
 - June 19-21
 - Registration opens mid April
 - Proposal form is open
- Release Updates
 - 4.12 coming in next few weeks
 - User management APIs: user merging, change username
- Metrics Updates
 - New repo: dataverse-metrics: <https://github.com/IQSS/dataverse-metrics>
 - Can aggregates metrics from multiple installations
- Community Questions
 - Other <5 , > 4.12 releases? Probably
 - Mix MDC w\ dataverse-metrics? (GD answered)
 - dataverse-metrics w\ custom time period? Some flexibility
 - DANS - extended metrics API, maybe PR
 - That would be of interest we've done some custom 'verse' level here: <https://dataverse.scholarsportal.info/metrics/?selection=>
 - User email verification at Sign Up (SP question)
 - Planned for 5; in a release soon?
 - Users can verify already; but verify status not used

- SP wants to offer institutional login and validate user accounts
- Generating API token for users in DV (question related to Data Curation Tool)
(SP question)
 - Allow users to click on the tool in Dataverse and get an API token
 - Jim already has written this API generation script ; could reuse this for configuration button (put PR out there for this)
 - Still need to discuss the messaging to inform the end - user
 - Isn't a way to invalidate it; could add time stamp to the messaging in the GUI
