

What is Reselling?

Reselling is essentially buying cheap copies of popular products with the exact functionality, design, and details of the originals. These copies can be bought from suppliers overseas and they sell these products for \$20-30 and they can then be resold for over \$200 each! It's up to you whether you sell them as real or copies! Some of the most popular products right now are sp5der hoodies, denim tears, hellstar, apple products and more. These products can all be sold for \$200 or more!

These products can be sold on online platforms such as depop, stock x, facebook marketplace, ebay and more! I would personally recommend ebay and fb marketplace.

To get these suppliers go to my instagram bio!
