

Activity	Emerging	Expanding	Bridging
Create loops	We should _____.	We should use _____ because _____.	I think we should (put, use, choose) __ because __; I still think __ is the strongest choice.
Use loops	I used loops to _____.	I used loop blocks in my Build-a-Band project to _____ because _____.	I used loop blocks in my project to _____ because _____. It was interesting to _____.
Explain parallelism	I think these actions will happen at the same time because _____.	I think these actions/programs will run parallel to each other because _____.	I think these programs will run parallel to each other because ____ and _____.
Explain initialization	Once the program finishes running, I think it will _____.	Once the program finishes running I think the program will reset like this _____.	Once the program finishes running I think it will initialize in this way _____.
Debug	I changed ____ to fix _____.	I debugged the program by changing _____.	I debugged the algorithms by fixing _____.
Project showcase	My project uses _____.	My project uses ____ and _____ because _____.	My project uses ____ and _____ because _____. The result is _____.
Peer critique	I like [peer's name] project because _____. From looking at your codes, I learned _____.	I observed ____ and ____ from [peer's name] project, which I think is interesting because _____. I noticed ____ in your code. I would _____.	When I discuss [peer's name] project with him/her, I found out that he/she was using ____ and _____. I would like to apply these code blocks in my project. From looking at your code, I learned _____. To modify your code, I would _____.
