Name: _____

Turkey Trot Race Log

Change SPEED or TURN (just one at a time!). Press RESET before every race. Run each setting 3 times.

Race	SPEED	TURN	Time (or DNF)	What happened?

My best reliable time: _____ seconds at SPEED _____ and TURN _____

Think about it

1. What happened when SPEED got too high? Why?

2. Did the same settings always give the same time? What does that tell you about testing?

3. What was the hardest bug in this project, and how did you find it?
