

Converting .WMA to .WAV/.MP3 on Apple OS (Mac)

1. **Open Audacity** from the applications folder in the toolbar

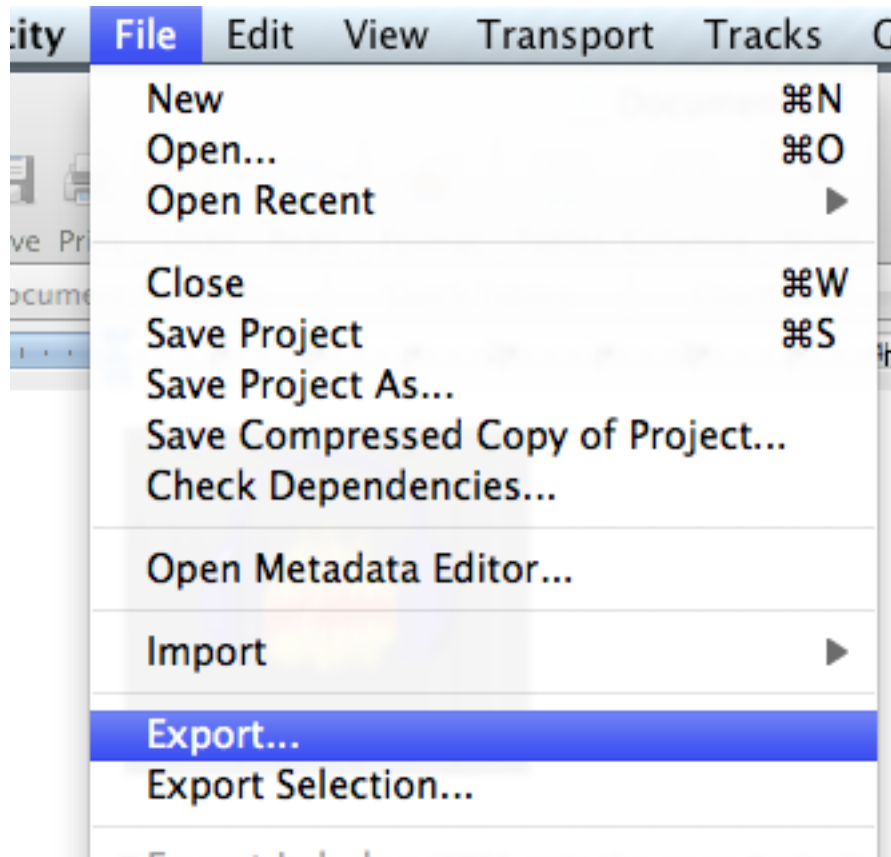

2. **Drag and drop your .WMA file onto the open Audacity window**

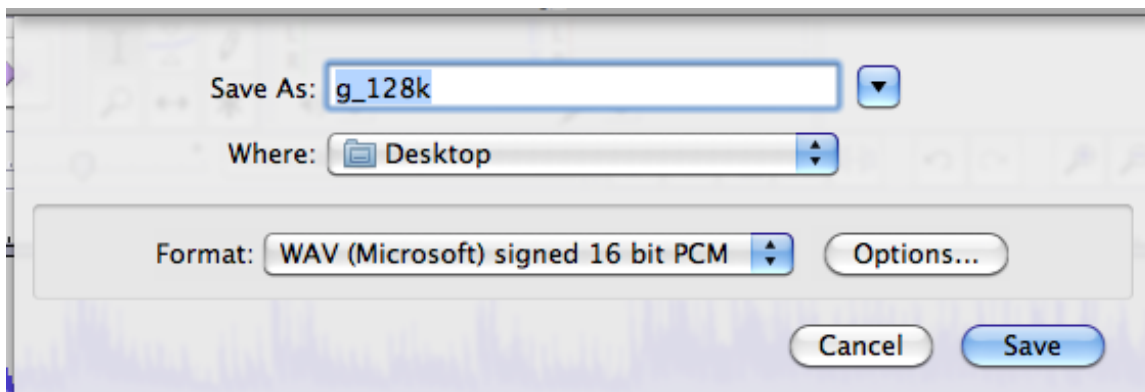

(It should look something like this.)

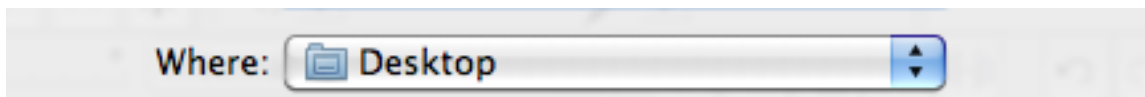

3. **Click File -> Export**

4. In the **Save As:** box give your project a name

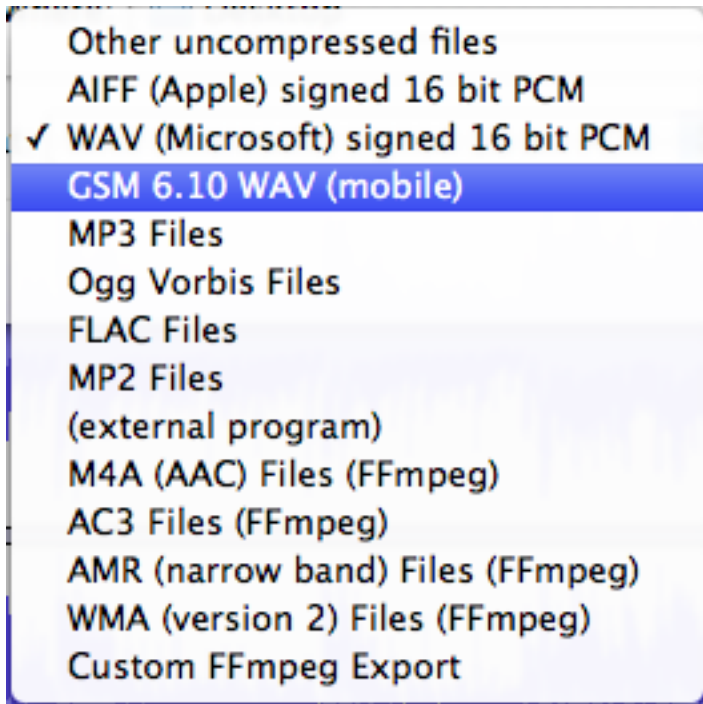

5. Choose a file destination from the **Where:** dropdown menu.

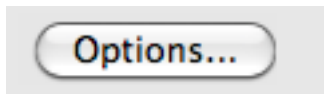

6. Under the **Format:** dropdown menu choose a desired file format

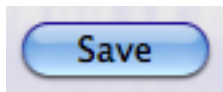

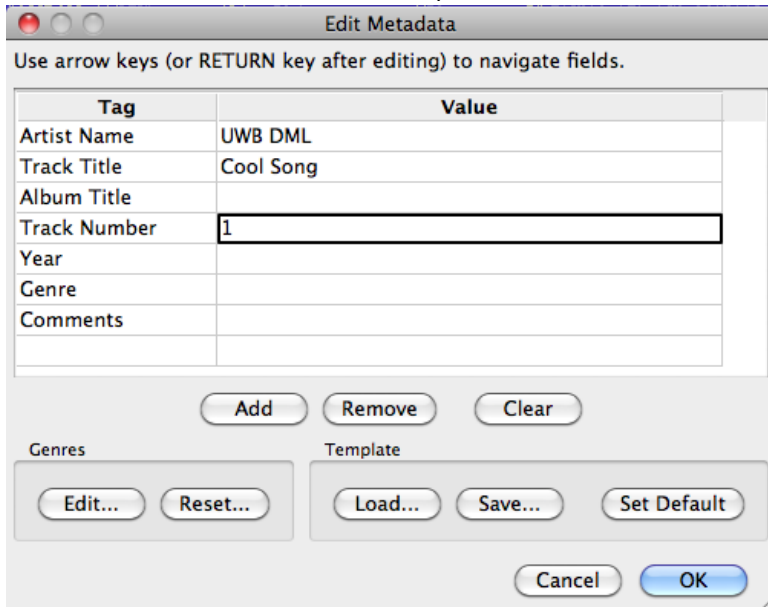

7. Alternatively click **“Options...”** for more audio options

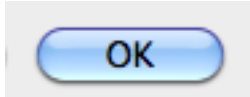

8. Click **Save**

9. **Enter Metadata Information** (Such as Artist and Track Name)

10. Click OK

11. You're done!
