

Student's use of time coding form

Teacher: Justin Nassivera

Class: EDU 255

Topic: Tchoukball

Grade: 12

Date: 2/23/2012

of Students: 12

Time analysis codes: Decision is based on what **51%** of the observed students are doing at the time.

M = Management	Time when <i>most</i> students (over 50%) are not receiving instruction or involved in lesson activity (e.g., changing activities, getting out or putting away equipment, listening to behavior rules or reminder).
A = Activity	Time when most students (over 50%) are involved in physical movement (e.g., catching a ball, throwing at a target, running).
I - Instruction	Time when most students (over 50%) are receiving information about how to move or perform a skill (e.g., how to move using all the space, watching a demonstration, listening to instructions).
W = Waiting	Time when most students (over 50%) are <i>not</i> involved in the other categories (e.g., group activity but only one or two are participating, waiting for a turn, off-task behavior, waiting for the teacher to give directions).

[illegible][illegible]

$$\text{Percent of M time} = \frac{70}{\text{TOTAL M seconds}} \div \frac{540}{\text{TOTAL LESSON seconds}} = \frac{12.96}{100} \%$$

$$\text{Percent of A time} = \frac{310}{\text{TOTAL A seconds}} \div \frac{540}{\text{TOTAL LESSON seconds}} = \frac{57.4}{100} \%$$

$$\text{Percent of I time} = \frac{170}{\text{TOTAL I seconds}} \div \frac{540}{\text{TOTAL LESSON seconds}} = \underline{31.48} \%$$

$$\text{Percent of W time} = \frac{10}{\text{TOTAL W seconds}} \div \frac{540}{\text{TOTAL LESSON seconds}} = \frac{1.85}{100} \%$$

Grade:
Management < 15% = 1 pt.
Activity > 50% = 2 pts.
Instruction < 30% = 1 pt.
Waiting < 5% = 1 pt.

Total Score (M+A+I+W)= 4
