

-Internal Tech and Research Department-
Report #1

<[REDACTED] X> *static* Something just broke past our firewall, it's infecting all of our documents!

<[REDACTED] Y> We can't trace its origin, it's an unknown cyber attack!

<[REDACTED] X> It could have come from somewhere abroad or even locally in our area. Check the server room-

<[REDACTED] Y> The server room door is locked shut, we can't get in! Even our keycards aren't working, and I'm supposed to be authorized to enter.

<[REDACTED] X> *grunts with frustration* This could be it for our government. We can't worry about where it came from, we have to minimize damage. Get every cyber security specialist in our disposal on it or its over for everyone in The Outskir—
