MONSTER MOUTH

Adobe Illustrator
TOOLS USED

 Blob Brush	 Eraser Tool	 Reflect Tool	 Selection Tool & Direct Selection	 Shape Tool
 Paintbrush				

STEP 1

BLOB BRUSH: Create a wide oval with your blob brush. It does not have to be a “perfect” oval. Color: Black

STEP 2

BLOB BRUSH: Create a long line following the bottom contour of the black shape with the blob brush. Color: Pinkish

STEP 3

BLOB BRUSH: Create a smaller oval with the blob brush, make it dark red. Fill it with a gradient that goes from light red (top) to darker red (bottom)

STEP 4

Reflect Tool: Make a copy of the last shape, then use the reflect tool to flip it. Align it so that it looks like a tongue.

STEP 5

Paintbrush: *(See fur tutorial)* Create a new paintbrush. Use this new paintbrush shape to look like a tooth. *Follow the same steps that you used to create the fur brush.*

STEP 6

Paintbrush: Draw in a set of teeth with the paintbrush. Draw one stroke for each tooth.
Follow the procedures from the fur tutorial to select & expand the appearance of the teeth lines, so that you can fill the teeth with a gradient.

Fill the teeth with a gradient fill of yellow & white.

TIP: You can draw one side of the mouth's teeth, select them, and copy and paste, then reflect them so that you only have to draw one set. Also, this will make the mouth appear symmetrical

STEP 7

Paintbrush:Repeat this process for the top teeth.

STEP 8

Blob Brush: Use the blob brush to draw "skin" over the mouth area.
