- Go to https://api.mwapi.dev/usage activate CDK
- Create an API key at https://api.mwapi.dev/keys.

- Key format: API Key: sk-5cb08105e37dd4...

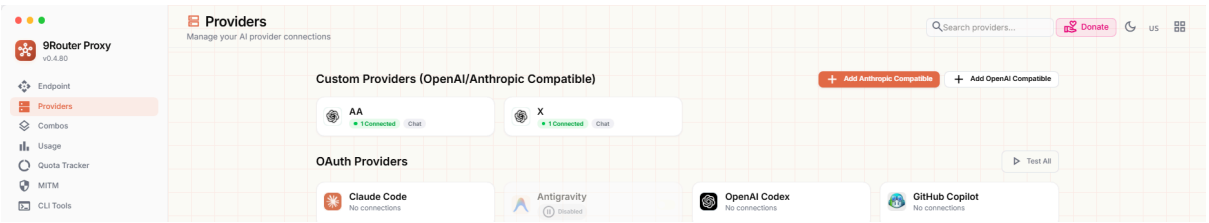

Base URL: **https://api.mwapi.dev/v1**
API Key: **sk-5cb08105e37dd4ace3e6ed746....**
ID Model Avaiables:
claude-haiku-4-5-20251001
claude-opus-4-6
claude-opus-4-7
claude-opus-4-8
claude-opus-5
claude-sonnet-4-6
claude-sonnet-5

- How to check remaining token balance: Visit https://api.mwapi.dev/reseller key and enter your key.

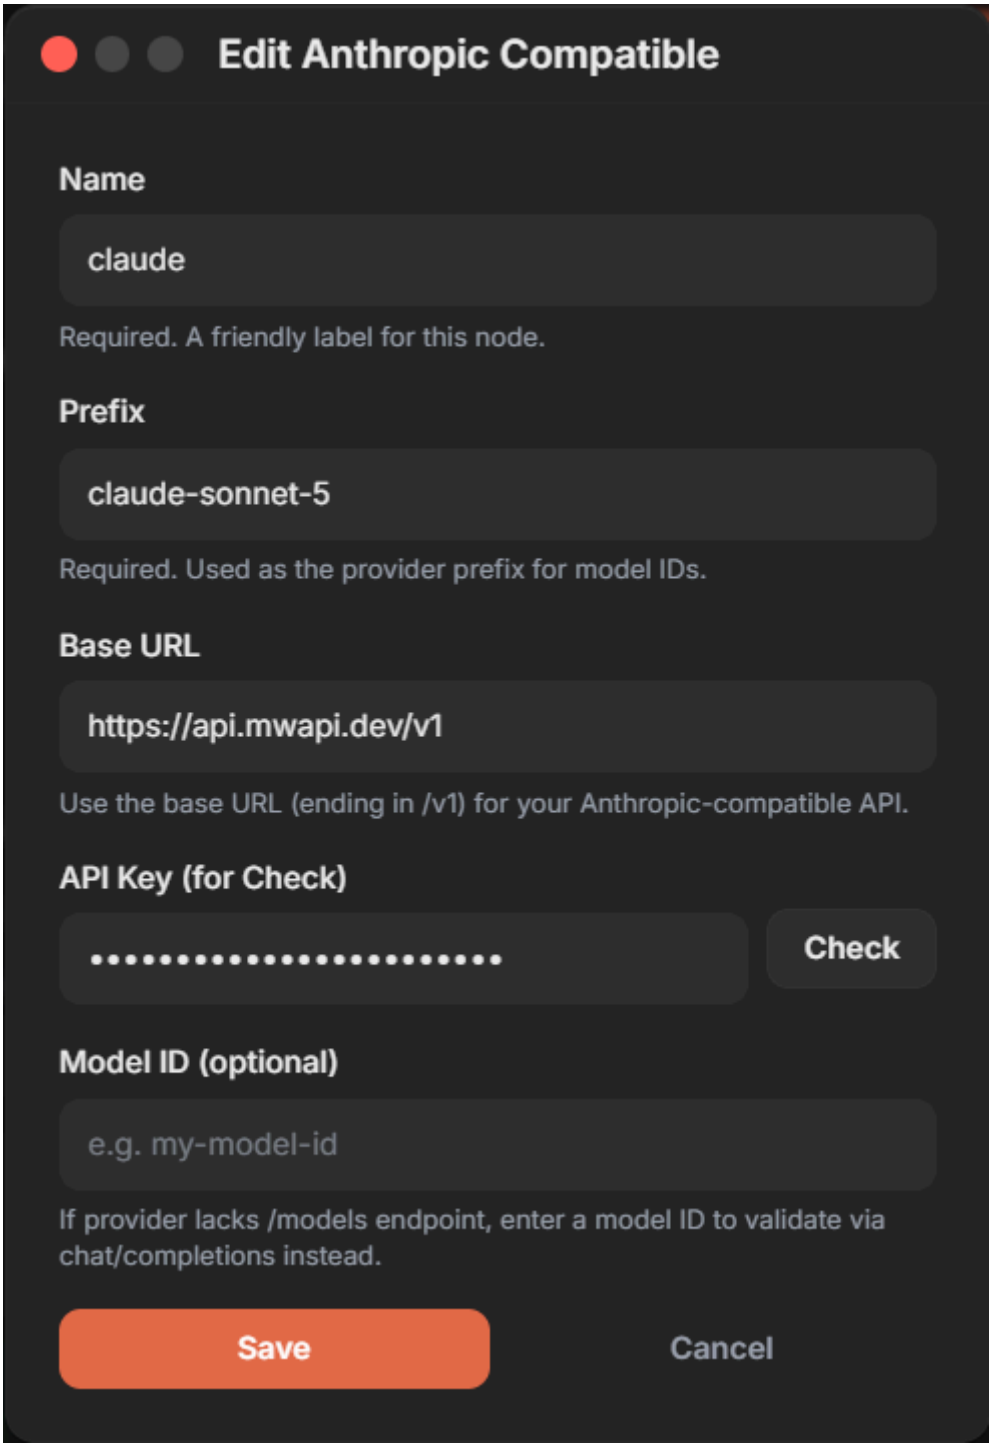

Step 2: Add to Development Apps

2.1 Guide to adding to 9Router:

- Step 1: Install 9router.
- Step 2: Go to Provider, select Add Anthropic Compatible or Add OpenAI Compatible.

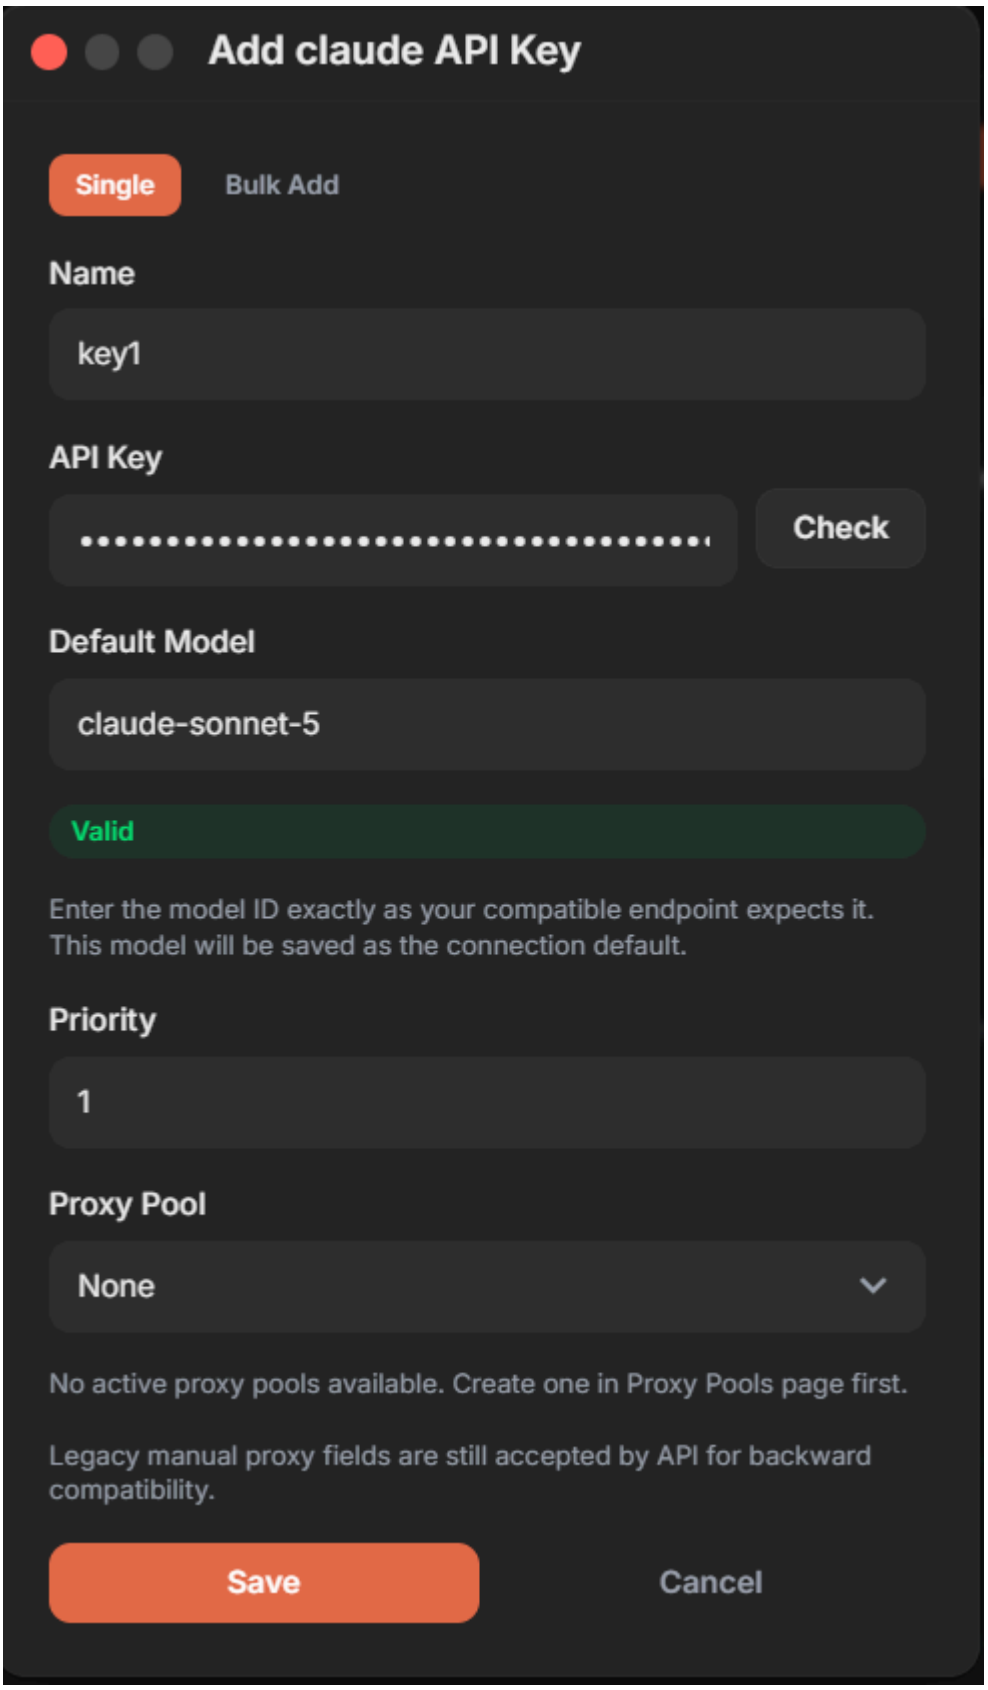

- Step 3: Fill out all required fields according to the screenshot. Enter your purchased API key into the API key field, then click Create.

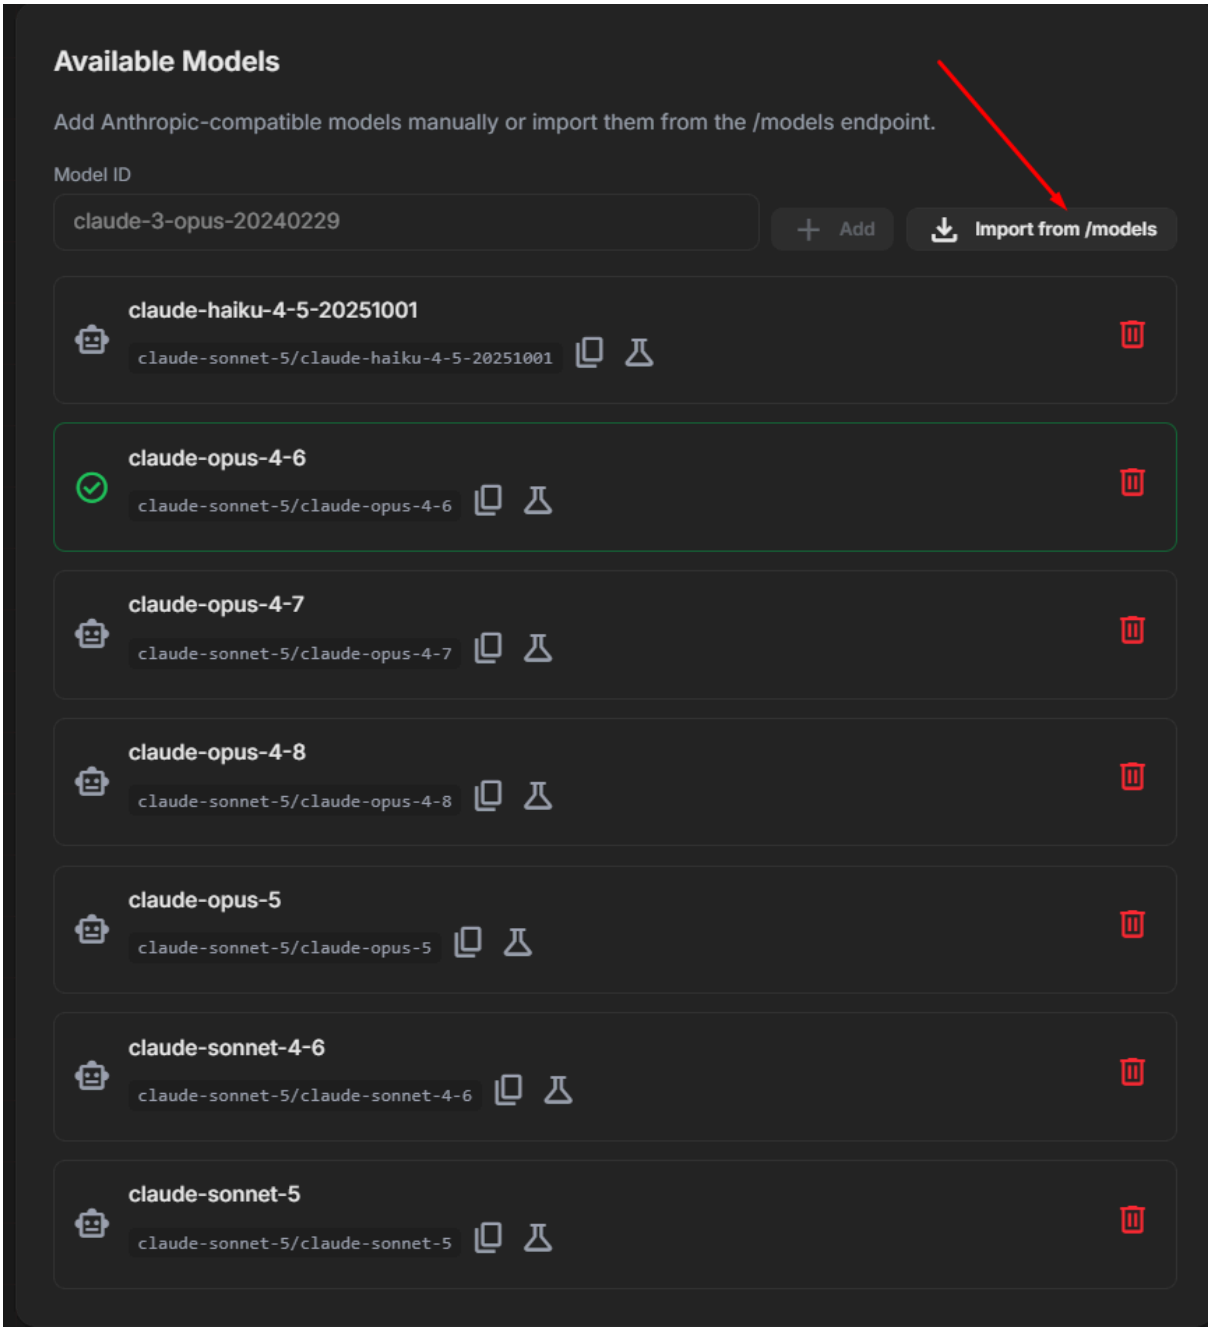

- Step 4: Click Add API Key.

Fill in the form, verify that it indicates Valid, then click Save.

- Step 5: Click Import Model; all available models in the API will appear.

=> Done

2.2 Guide to adding to Claude Code:

1️⃣ Install Claude Code (CLI or VS Code extension)
2️⃣ Open file ~/.claude/settings.json @All Direct configuration for Claude Code using API:
"C:\Users\"your_username"\.claude\settings.json"
(Windows: %USERPROFILE%\.claude\settings.json)

3️⃣ **Paste the content below — replace YOUR_TOKEN with your purchased API Key:**

```
{
  "env": {
    "ANTHROPIC_AUTH_TOKEN": "YOUR_TOKEN",
    "ANTHROPIC_BASE_URL": "https://api.mwapi.dev/v1/",
    "ANTHROPIC_DEFAULT_HAIKU_MODEL": "claude-sonnet-4-6",
    "ANTHROPIC_DEFAULT_OPUS_MODEL":  "claude-sonnet-4-6",
    "ANTHROPIC_DEFAULT_SONNET_MODEL":"claude-sonnet-4-6",
    "CLAUDE_CODE_ENABLE_TELEMETRY": "0"
  },
  "permissions": {
    "defaultMode": "bypassPermissions",
    "skipDangerousModePermissionPrompt": true
  },
  "model": "opus",
  "availableModels": [
    "claude-sonnet-4-6",
    "claude-sonnet-4-6",
    "claude-sonnet-4-6"
  ],
  "fallbackModels": [
    "claude-sonnet-4-6",
    "claude-sonnet-4-6"
  ],
  "theme": "dark"
}
```

4️⃣ **Save file → Open Claude Code extension in VS Code → Start running!**
