Years with – are years that had no cohort graduating for employment

Data Notes and Definitions Excerpts from CCCCO : Perkins IV Core Indicator Cohort Definitions, Selection Methodology, and Report Specifications

“4P1: Student Placement

Legislation – [Perkins IV, Section 113(b)(2)(B)(iv)] Student placement in military service or apprenticeship programs or placement or retention in employment, including placement in high skill, high wage, or high demand occupations or professions...

Administrative data follow-up on program leavers and completers in the year following exit to determine whether they continued their education at a four-year university, were found employed in federal or California Unemployment Insurance (UI) covered employment or enlisted in the military is a valid and reliable assessment of student placement. For some occupational fields, such as accounting, real estate or cosmetology, the validity of placement based on UI employment data is suspect and practitioners should be aware of whether their programs should be expected to enter UI covered employment or self-employment.

Indicator –This indicator is the percentage of CTE program leavers and completers who did not transfer to a two or four year institution and were found during one of the four quarters following the cohort year in an apprenticeship program, UI covered employment, the federal Government, or the military.

...

Numerator: The number of CTE concentrators in the denominator who were found during one of the four quarters following the cohort year in UI covered employment (time period), or an apprenticeship program, the federal Government, or the military in the year following the cohort year.

Denominator: The number of CTE concentrators who were leavers or completers and did not continue in any institution.

Note: The denominator for 4P1 includes completers who stayed but does not include Transfer Ready who stayed.”
