

“Cheat Sheet”

It is highly irregular that a teacher encourages a “cheat sheet” let alone constructs one for you; however, this is one area where we can let the normal rules slide and give you something that will provide you with an edge when it comes to making your overall time limit.

Listed below - in the shortest closing to longest - are sign offs that you can use at the end of your presentation that will let you make time and still sound good in the process. This is just a skeleton for how you could construct your own sheet. Obviously, you can add your own personal touches. I have completed ten closings. I will expect a minimum of six from you.
