# rOpenSci Community Call - Mentoring & training program for Scientific Open Source Champions

This doc - https://bit.ly/ropensci-commcall-champions - is a place for collaborative note-taking. It includes:

- Agenda
- Attendees list. Please add yourself
- Questions from attendees. All are encouraged to ask and answer in this doc.
- Resources. Add your favorites.
- Transcript of the call will be added afterward.

Information on today's topic, with speaker bios:

https://ropensci.org/commcalls/oct2022-champions/

This **call will be recorded** and posted along with any other resources at <a href="https://ropensci.org/commcalls">https://ropensci.org/commcalls</a>.

# Agenda

- 1. Welcome, Yani Bellini Saibene (2 min)
- 2. rOpenSci Champions Program, Yani Bellini Saibene (8 min)
- 3. Panel with Santosh Yadav and Emanuele Bartolesi on being a Community Champion (30 min).
- 4. Q & A moderated by Yani (19 min)
- 5. Wrap-up, Yani Bellini Saibene (1 min)

You all have expertise to share! Add your questions by typing them <u>below</u>, and share your thoughts by answering others' questions. Together we can make this a rich resource for all of us.

# In attendance (please add yourself here):

- Name; Affiliation; Country
- Alycia Crall; The Carpentries; USA
- Steffi LaZerte; rOpenSci, Manitoba, Canada
- Olivier Leroy, USA Ohio

- Ghozayel elotteebi, OSCSA, Saudi Arabia
- Beatriz Milz; Curso-R / University of Sao Paulo ; São Paulo Brasil
- Annelisa Stephan; GitHub (Docs team); Los Angeles, USA
- Leticia Vega Alvarado; Universidad Nacional Autónoma de México, México
- David Martínez; CentroGeo; Mexico
- (Nayarett) Pilar González, PUC, Chile.
- Juan Cibantos; Betta Labs/Ministerio de Educación BA; Argentina
- Andree Valle Campos; LSHTM; Peru
- Russ Allen, Chicago, USA
- Adeyinka Oresanya, CHAOSSAfrica, Nigeria
- Ezekiel Adebayo Ogundepo; 54gene, Nigeria
- Matías Muñoz, Montevideo, Uruguay
- Javier Moreira, Clisco, Montevideo, Uruguay
- Victor Ordu, Abuja, Nigeria
- Rajesh,India
- Laura DeCicco, USGS, Madison, WI (having audio issues...)
- Javier Acevedo, IRC, Mexico
- Rony Rodriguez-Ramirez, The World Bank, USA/Nicaragua
- Ernesto Mirt. Ecuador / Venezuela
- Pao Corrales, Argentina
- Natalia Morandeira, Argentina
- Shamsuddeen Muhammad, Bayero University, Kano, Nigeria
- Carolina Aldana, Argentina

STEAM: Science, technology, engineering, and mathematics

GDE: Google Developer Experts

30 attendees at peak (including speakers)

#### Questions from attendees

**Add your questions** by typing them below, and share your thoughts by **answering others' questions**. Together we can make this a rich resource for all of us.

- For both: do you apply, do you were invited, or how do you become a champion?, how do you know about these possibilities?
  - (your name) your response
  - Ghozayel, I was invited and suggested to participate by OSCSA
  - o I received an email invitation from Yanina +1+1
  - o ROpenSci Twitter
- For both: do you have any recommendation to apply to this kind of programs?

Start to create content on what you love.

0

• Is working around, amplifying and improving already developed packages, or adapting to R functions from other platforms viable for the program?

0

- Curious why content creation is important to being an open source community leader?
  - Santosh: All these communities, e.g., MVP, GitHub Stars, the rOpenSci community, we all need people who can teach other people. Helping other people learn something new matters to the community. There are instances where even the product team doesn't know everything about the product they're building. There are 100–200 people working on Codespaces, and [none of them] know all the features. They need people exploring the products and telling the world, "this is possible" the possibilities aren't known to the team, they're only known when someone explodes the product and writes about it, to teach people about it. That's why content creation matters for everyone. Angular: If I'm creating content on Angular, it is helping the core team of 35–40. They can't both push features and put out content. Community leaders can come up with new possibilities. That's the content the team wants, but can't do on their own. Community members creating the content are teaching something new. It grows the product as well.
    - Yanina: People follow you because they know you. And they know you because you create something useful for them. I want people to learn and use the technology. I love R and coding and that's why I started to share. As a consequence, some people really like what we do.
    - Emanuele: A friend said, "I'd like to start blogging but I don't have anything to share." But share your experience, share your journey. It's useful for other people to understand how to start.
    - Yanina: When you start, you feel impostor syndrome. But we have a lot to share, whether it's 3 people or 1,000. You don't have to be a book to publish something. What's going to make you a leader is your willingness to share. [It could be] simple stuff.
  - Keep giving back to the community, and you will be amazed at the results you will see.
  - English is a huge barrier. I hope we have bilingual or trilingual champions to create content in the language of their country or region.

#### Comments from attendees

What things would you like us to clarify? Tell us and we'll reply here after the call.

What do you mean by "a solid idea for an R package"?

You have an idea and the data, permission (if need it to create the package). It can be
about your discipline. Or something in your institutions. You have an idea of what do you
want the package do.

I have no experience on developing a package. Can I apply?

• You need to know who to code in R, who to create functions, know about the different type of data, the conditional functions (if, else, for loops, map). We will teach you how to create package but we will not teach R from scratch.

For Yani: can you talk more about being a mentor? I saw that today in the website. How many hours is expected to work as a mentor? // 2 hours/month

# Share your perspectives on the Community Calls we're planning

Ideas for upcoming Community Calls are shared as <u>issues in this public repository</u>. Give a on a topic, share your perspective by commenting on a topic, or open a new issue if your idea doesn't fit in any others.

### **Transcript**

00:00:23.000 --> 00:00:41.000

I'm Yani Bellini Saibene, rOpenSci's Community Manager and I welcome you to our community call on Mentoring & training program for Scientific Open Source Champions.

00:00:41.000 --> 00:00:45.000

rOpenSci is a non-profit initiative founded in 2011.

00:00:45.000 --> 00:00:53.000

We create technical and community infrastructure for open and reproducible research in the R language.

00:00:53.000 --> 00:00:57.000

This includes a curated collection of over 300 R

00:00:57.000 --> 00:01:01.000

packages, a software peer review system,

00:01:01.000 --> 00:01:15.000

the R-universe platform for building, testing, and publishing R packages, and documentation and community engagement programs to support scientific R developers.

00:01:15.000 --> 00:01:19.000

We have a Code of Conduct that applies to this Call.

00:01:19.000 --> 00:01:30.000

You can find it in the footer of our website at ropensci.org along with guidelines for reporting and enforcement.

00:01:30.000 --> 00:01:38.000

So as I say, this session is being recorded and the video and any other resources will be posted at ropensci.org/commcalls

00:01:38.000 --> 00:01:43.000 We'll tweet from rOpenSci when

00:01:43.000 --> 00:01:49.000

when all these materials are up. Today we'll be using a shared

00:01:49.000 --> 00:01:56.000

google doc for collaborative note-taking. My colleague Steffi. will place the link on the zoom chat.

00:01:56.000 --> 00:02:16.000

So please go inside the document, add your name and affiliation to the attendee list, and we invite you to take your own notes on the docs. If you have any questions to add there, so we can share them with our guesses.

00:02:16.000 --> 00:02:26.000

It is my pleasure to introduce our presenters. Today we have Santosh Yadav. Santosh works as Senior Software Engineer at Celonis,

00:02:26.000 --> 00:02:31.000

He is a GDE for Angular, GitHub Star.

00:02:31.000 --> 00:02:37.000

and an Auth0 Ambassador( I hope that I pronunciate right that last one.)

00:02:37.000 --> 00:02:42.000

he loves contributing to Angular, NgRx and Nx.

00:02:42.000 --> 00:02:49.000

for This is Learning where we run free publication and the This

00:02:49.000 --> 00:02:52.000

is Tech Talks show, and Emanuel Bartolesi.

00:02:52.000 --> 00:03:11.000

Emanuele Bartolesi. Emanuele is a Microsoft 365 Architect and it is passionate about frontend technologies and everything related to the cloud, especially Microsoft Azure. Currently live in Zurich and actively participate in local and international community activities and events.

00:03:11.000 --> 00:03:17.000

Emanuele became Twitch Affiliate as a live coder. Since 2014 is a Microsoft MVP

00:03:17.000 --> 00:03:28.000

In developing technologies. in the Developer Technologies category and also is a GitHub Star since 2022. We are going to do a brief introduction to our Champions Program.

00:03:28.000 --> 00:03:34.000

and then Santosh and Emanuele will share with us their experience on being a community champion.

00:03:34.000 --> 00:03:44.000

We will speak for about 40 minutes and the rest of the hour will be for questions, answers, and discussion.

00:03:44.000 --> 00:03:49.000

If you have any questions, allow, please use the chat, or raise your hands.

00:03:49.000 --> 00:03:57.000

And we can address it. Yeah, So I'm going to share my screen from this moment.

00:03:57.000 --> 00:04:06.000

So I tell you about the champion program of rOpenSci, and then we will go back to see our faces and chat together.

00:04:06.000 --> 00:04:20.000

So let's see if I can share. After 3 years of the pandemic I still don't know if I choose the right screen, let me know if you are seeing my slide deck. Yes, Okay, awesome.

00:04:20.000 --> 00:04:26.000

I see you nodding. Thank you. So much.

00:04:26.000 --> 00:04:33.000

Okay, we are really really excited at rOpenSci launching this champion program.

00:04:33.000 --> 00:04:49.000

This is a mentoring and training program for scientific Open source champions. The idea of these champions programs, in general, is to identify, recognize and reward leaders in a community.

00:04:49.000 --> 00:05:03.000

So we are looking for people who are active in our community and want to go through this program with some specific goals.

00:05:03.000 --> 00:05:13.000

We are looking for people who work in STEAM fields from anywhere in the world, and who already have some development knowledge with the R language.

00:05:13.000 --> 00:05:24.000

And have a solid idea for an R package they want to develop, or they already have another package and want to have it peer-reviewed through

00:05:24.000 --> 00:05:32.000

rOpenSci process or they want to become a reviewer for rOpenSci.

00:05:32.000 --> 00:05:42.000

With these three goals, if you like these ideas, then you can apply. For this first group.

00:05:42.000 --> 00:05:52.000

We need that you have some basic English communication skills (written and verbal). But come on, I'm here speaking with you in English,

00:05:52.000 --> 00:06:04.000

ao most people will comply with this last point; and if you have any doubts you can contact me, and we can chat about the program.

00:06:04.000 --> 00:06:17.000

we are going to select between 6 and 9 people for this first group, and these selected champions will participate in training a cohort base training of 6 weeks.

00:06:17.000 --> 00:06:25.000

long. We are going to teach you how to plan and facilitate, engaging, and inclusive workshops.

00:06:25.000 --> 00:06:36.000

knowledge on different ways and paths, and channel through, you can engage and collaborate with rOpenSci and R projects, in general.

00:06:36.000 --> 00:06:44.000

Technical skills in software development, and code review.

00:06:44.000 --> 00:06:49.000

And the idea is that you also will have some meetings with mentors.

00:06:49.000 --> 00:06:56.000

We are going to pair you with a mentor, and quarterly cohort calls with the entire groups of champion.

00:06:56.000 --> 00:07:10.000

Yes, we estimate that you will need an average of 10 h a month for the program, and we'll we offer you a small stipend of \$1,000

00:07:10.000 --> 00:07:21.000

for your participation in the program. After the training, you are going to develop one of those projects: create the new package that you always dream to create.

00:07:21.000 --> 00:07:28.000

Go through the review process with your package or become a reviewer in our peer

00:07:28.000 --> 00:07:49.000

review system, and we also give you the chance and the opportunity to choose between other kinds of activities like giving talks participating in these kinds of calls, writing some blog posts, or teach to other people in your community about everything you learn here.

00:07:49.000 --> 00:07:56.000

So some important dates: in November one, we are going to have a co

00:07:56.000 --> 00:08:11.000

working hours, so you can attend there, and we are going to give you help and advice on your application, and November 7 is the last day to send the application for the champions program.

00:08:11.000 --> 00:08:23.000

We also open the call for mentors. So if you feel that you already know how to develop a package or how to do peer review and you will like to help some of the people,

00:08:23.000 --> 00:08:34.000

some of the selected champions for rOpenSci, for our community, please also join to apply as a mentor

00:08:34.000 --> 00:08:39.000

Finally, here are my contacts, and how you can, differents ways

00:08:39.000 --> 00:09:05.000

you can contact me to make questions, or make proposals, and or get some answers that you want, for the champions program. So this is my email, my calendly and the twitter and email, and the forum of discussion of rOpenSci. This slide are on our shared doc, so you can find the link.

00:09:05.000 --> 00:09:15.000

to these resources, and that's it from me. I go to stop sharing and

00:09:15.000 --> 00:09:43.000

we are going to start the chat with Emmanuel and Santosh, which I will ask him to, I already did a brief introduction, but I would like you to tell me about what you do, and how you become champions in these several communities you are part of. So which one wants to start?

00:09:43.000 --> 00:09:55.000

Santhos, I think you can go. I mean, I'm in a hotel room, so probably my voice is not great. Go ahead.

00:09:55.000 --> 00:10:04.000

Good. I start. Okay, So I'm Emmanuel, as Yanina mentioned in the beginning.

00:10:04.000 --> 00:10:10.000

I'm a 365 architect. But let's see, for 5 or 6 h during the day

00:10:10.000 --> 00:10:15.000

I write code because it's what I like to do.

00:10:15.000 --> 00:10:19.000

And this is what I love to do, but I'm an architect as well. So it's just an A

00:10:19.000 --> 00:10:23.000

but first of all, I'm a developer. Okay?

00:10:23.000 --> 00:10:35.000

And yeah, but I develop some products for my Microsoft 365 system, because I don't Let's say, during the day

00:10:35.000 --> 00:10:44.000

I didn't do any, let's say, consultancy activities for customers, but just writing products.

00:10:44.000 --> 00:10:50.000

it seems more or less five years right now before I created it a product

00:10:50.000 --> 00:11:01.000

call it Easy Life 365. But I left the company one year ago, and then I created two products.

00:11:01.000 --> 00:11:13.000

Software One and one is call it "red origin". But it's not the let's say the official name is the internal name, and is the web application.

00:11:13.000 --> 00:11:36.000

for your governance. Okay, so this is what I do during the day, more or less, And in the meantime I use my free time, that I don't have, to collaborate on open-source projects and create code for the community. So this is my mains activities during the day and of course, it's

00:11:36.000 --> 00:11:42.000 not easy to find free time to create

00:11:42.000 --> 00:11:48.000

let's say content for free. So as you can imagine.

00:11:48.000 --> 00:11:54.000

But I don't know if you want to switch to Santosh

00:11:54.000 --> 00:12:08.000

Yanina, or

00:12:08.000 --> 00:12:13.000

Yeah, ok. Santosh if you want to. I will take some of the things you said Emanuele to rephrase some questions. So, hi everyone. Thanks so much Yanina for this this call.

00:12:13.000 --> 00:12:20.000

I mean, I I'm on road from last 20 days, so I've been traveling, and this was the ...Okay, in my hotel room and

00:12:20.000 --> 00:12:27.000

I said, Yes, let's do it, because this is what excites me speaking to communities and becoming part of different communities.

00:12:27.000 --> 00:12:31.000

inspiring other people to become part of our joint communities.

00:12:31.000 --> 00:12:38.000

Because this is what I think communities have played a lot they are a big part in my career

00:12:38.000 --> 00:12:43.000

so far, so heads off to you to actually start this community and start this initiative.

00:12:43.000 --> 00:12:47.000

So I'll introduce myself. My name is Santhosh, and I am basic,

00:12:47.000 --> 00:12:54.000

currently I'm in Germany. So I moved at the start of this year to Germany to work here.

00:12:54.000 --> 00:12:58.000

I work as a senior software engineer at a company called Celonis.

00:12:58.000 --> 00:13:05.000

Apart from that, of course, a Google developer expert, GitStar. and an Aouth0 Ambassador as well, And I am a speaker.

00:13:05.000 --> 00:13:08.000

So I keep giving talks at different conferences.

00:13:08.000 --> 00:13:13.000

That's where I was in US last week, and now flying or traveling to Poland tomorrow.

00:13:13.000 --> 00:13:17.000

So in case anyone is in Poland, please feel free to just send me a DM and

00:13:17.000 --> 00:13:34.000

we can meet, yeah, and I've been contributing to Angular from a long time now, so I started like in 2019. So I'll just tell you the story of how I became part of this GDE Program and GitHub start program. So I started

00:13:34.000 --> 00:13:46.000

contributing in 2019, so I worked for 11 years in tech, and then I was not satisfied with my career, was like Why, I'm just writing code for some companies, which and they are making

00:13:46.000 --> 00:13:49.000

money, but I have a lot of things to give to the community.

00:13:49.000 --> 00:13:59.000

So I started. Started that, started with that, and then started with the open source, started contributing to a project called Ngx, which is still one of my favorite projects.

00:13:59.000 --> 00:14:03.000

Whenever I get time I contribute to it. As Emanuele said, right,

00:14:03.000 --> 00:14:13.000

It's really hard when you do so many things to actually continue doing that, or even contributing to open source.

00:14:13.000 --> 00:14:19.000

So and then, I started, contributing to Angular, and I was enjoying that phase right, I mean, there are times in your career.

00:14:19.000 --> 00:14:22.000

you will, you love doing something like it comes from your heart. That

00:14:22.000 --> 00:14:25.000

okay, this is what I want you to do for a long time.

00:14:25.000 --> 00:14:36.000

So I kept doing that. I kept contributing to Angular, and I was approached by Google, So he said, he sent me a message on Linkedin Hey just let's catch up.

00:14:36.000 --> 00:14:40.000

There is a program called GDE. And I was like, Okay, what is this?

00:14:40.000 --> 00:14:44.000

And then we spoke about it. I was like, okay. He approached me for machine learning.

00:14:44.000 --> 00:14:46.000

I was like. No, I don't do machine learning. I do

00:14:46.000 --> 00:14:50.000

Angular, and he said, Yes, there is a program for Angular as well, and then that's how it started.

00:14:50.000 --> 00:14:59.000

So I was like. It was not too far, I mean, I was like started contributing 6 months, 7 months, and I got approval for this GDE

00:14:59.000 --> 00:15:06.000

Program. And then I applied. I became GDE in 2019, and I kept doing this, so I kept contributing.

00:15:06.000 --> 00:15:09.000

I kept giving remote talks because, of course, you know right?

00:15:09.000 --> 00:15:22.000

So 2020 came up with the bad news. Believe me, I mean, I gave a talk, and after 2 days everything was closed on flights canceled that can pre lock. Like okay. I was lucky to at least give a one.

00:15:22.000 --> 00:15:25.000

Talk in 2020, and that was the last in person

00:15:25.000 --> 00:15:31.000

conference I spoke to, and now I spoke after three years in US last week.

00:15:31.000 --> 00:15:35.000

So yeah, my second, which was in person.

00:15:35.000 --> 00:15:41.000

And so I kept like, okay after everything closed down, I started giving remote talks.

00:15:41.000 --> 00:15:55.000

I kept contributing, and around the same time, I think it was March 2020, when the GitHub Stars program was launched, and so many people, I mean, so I think the initial phase was where they hand-picked a few of the stars.

00:15:55.000 --> 00:16:02.000

So they were like amazing people from the community. And then they started promoting the program, and this is where I came to know about it.

00:16:02.000 --> 00:16:17.000

And I was like, okay. So I shared it in my network, as said, Okay, if you think I think there are a lot of developers in India who are doing so much amazing work in open source, so nominate, nominate the 2 developers you know it, I was not expecting that I will be

00:16:17.000 --> 00:16:20.000

nominated, and then I'll receive a mail after a few months

00:16:20.000 --> 00:16:24.000

That, okay, you have been nominated for Github Star programmers like, Okay?

00:16:24.000 --> 00:16:37.000

And then because it's it's a, I mean, when I see the people like Emanuele, even Daniel, you, as, I'm like, okay, how how I can be, I mean, how I'm part of this, right?, I mean, it's so huge. so many amazing

00:16:37.000 --> 00:16:40.000

people you admire, and you like your fan of them, right?

00:16:40.000 --> 00:16:44.000

so I was like, Okay, let's, let's apply. Let's give it a chance.

00:16:44.000 --> 00:16:57.000

And then, somehow, I was the first Indian to become a GitHub star, which I still it's like a proud moment for me, because something from India, I mean, which has like probably millions of developers, most developers in the world. I would

00:16:57.000 --> 00:17:03.000

say, and becoming the first one to become a GitHub Star is really a huge post for anyone, right?

00:17:03.000 --> 00:17:23.000

And then I never stopped. I think it's it's been 3 years now, more than 3 years I've been just giving back to the community because the community, whatever I am right now, or today, is because of the communities like it GDE programs or GitHub Stars program they they actually. How you can said?

00:17:23.000 --> 00:17:28.000

They just support you in a better way, so you can actually keep focus focus on your work.

00:17:28.000 --> 00:17:34.000

For example, I mean, I'll give you some examples of perks which you get So let's say GDE program.

00:17:34.000 --> 00:17:42.000

So GDE programs allows you to actually probably give you some money to travel, for example, if I'm I'm going to Poland tomorrow

00:17:42.000 --> 00:17:46.000

so it's like I don't have to pay everything from my own pocket.

00:17:46.000 --> 00:17:51.000

I'm getting sponsored by Google for traveling to the conferences, speaking at conferences.

00:17:51.000 --> 00:17:55.000

And this is what comunities enable you to do. Right.

00:17:55.000 --> 00:18:00.000

I mean, of course not everyone's so rich, I mean, I am not so rich that I can travel to any part of the world and give talk.

00:18:00.000 --> 00:18:04.000

I'm not so. So. This is where communities comes into the picture.

00:18:04.000 --> 00:18:20.000

They they invest in you. Of course you are. You are also playing your part in enabling next probably 1,000 or 10,000 developers, because you are reaching out to them, and you're talking about some technology for example let's say if I go to, or Yanina goes to, or Emmanuel goes to any conferences they will tell

00:18:20.000 --> 00:18:24.000

you that? Okay. They are a GitHub Stars, and then people will think, Okay, what is GitHub Stars, right?

00:18:24.000 --> 00:18:28.000

And you are promoting them. You're talking about GitHub.

00:18:28.000 --> 00:18:31.000

Similarly, if you, if you say are an MVP or GDE.

00:18:31.000 --> 00:18:38.000

People get interested in this by listening to and by seeing you on the stage as a community contributor.

00:18:38.000 --> 00:18:41.000

Okay, this guy is here because of these programs or he contributed.

00:18:41.000 --> 00:18:47.000

And he became this so more and more people will become part of the community, And this is what we need right?

00:18:47.000 --> 00:18:54.000

More people into the community, contributing or giving back to the community.

00:18:54.000 --> 00:19:00.000

Okay, Yanina that is my story. Thank you both. I will go with you Emanuele with one question.

00:19:00.000 --> 00:19:15.000

You both talk about what you do for living then you talk about your work on the community Santosh says it is a way to give back, but it's also a way to for new

00:19:15.000 --> 00:19:25.000

new people to get some resources to do what he likes, to help other people in the community.

00:19:25.000 --> 00:19:34.000

You feel proud also to be recognized, and you also help the community when everywhere you go, you talk about this.

00:19:34.000 --> 00:19:44.000

And you, Emanuele, said something that was pretty interesting that you say I create content for free, so people can use it. And sometime.

00:19:44.000 --> 00:19:45.000

It's not so easy to find that time. So, Do you want to talk a little more about about that?

00:19:45.000 --> 00:19:57.000

00:19:57.000 --> 00:19:58.000

00:19:58.000 --> 00:20:04.000

About why you wants to give this to the community to share your knowledge, and how these programs can help you with this, when I can do this?

00:20:04.000 --> 00:20:14.000

Yeah, of course. Yes. I started let's say, to create contents like blog posts, or I don't know, sessions at events.

00:20:14.000 --> 00:20:18.000

Because I like to share my knowledge. No, not my knowledge

00:20:18.000 --> 00:20:24.000

My experience. Is different. Because I don't have too much knowledge to share.

00:20:24.000 --> 00:20:36.000

I think in 5 min I'm not, but but alright, See, I like to to share my experience during my, the same, because during the day I did a lot of stuff, I do a lot of stuff

00:20:36.000 --> 00:20:45.000

and when I find during the day something that is, that I think it's interesting

00:20:45.000 --> 00:20:57.000

I open my Notion, because I use Notion as a second brain, and I put the ideas on Notion, and then I will come back to the Notion after

00:20:57.000 --> 00:21:05.000

maybe 2 weeks, and then Yeah, this is how I started more or less to share my experience to other people.

00:21:05.000 --> 00:21:13.000

Because yeah, in 2022 or 10 years ago, the is not.

00:21:13.000 --> 00:21:18.000

It's not possible to work like in the nineties, in a dark room.

00:21:18.000 --> 00:21:26.000

only with your PC, and your, yeah, let's see, your own knowledge and nothing else.

00:21:26.000 --> 00:21:31.000

You have to share this experience. You have to listening to others.

00:21:31.000 --> 00:21:37.000

This is another importance thing. You have to

00:21:37.000 --> 00:21:40.000

Let's say.

00:21:40.000 --> 00:21:49.000

Is it. To learn to listen other stories and get, I say, everything from the others.

00:21:49.000 --> 00:21:55.000

This is another important stuff. And yes, so this is why I started more or less.

00:21:55.000 --> 00:22:07.000

This is the main reason. And then, of course, a little part is also, let's say, and because I like, say, to be on stage.

00:22:07.000 --> 00:22:19.000

of course, we are not hidden figures, because it's also a kind of. When you started

00:22:19.000 --> 00:22:40.000

When you start first is not easy to say. Okay, now I stopped to do some public session or suffer that, and because of imposters syndrome, of course, as a maybe Santosh or other, GDEs or MVPs and it's not easy to say okay, now, this is my last session in

00:22:40.000 --> 00:22:55.000

the world, because every time you are invited to events, or to write a blog post in, let's say, an important website or stuff like that, it is not easy to say no every time.

00:22:55.000 --> 00:23:04.000

So. So. But yeah. Of course, this is more or less the let's see. The main reason is to share the experience.

00:23:04.000 --> 00:23:05.000

Okay, yes, You both mentioned this. This increase on your contact network, and this chance to be in the same place with people we admire.

00:23:05.000 --> 00:23:19.000

Yes, the main reason is to share the Spd experience honestly.

00:23:19.000 --> 00:23:33.000

Oh, this is rather important thing, because for instance, today I had an issue at work, and I spent or I wasted, this better, maybe 2 h to try to solve by myself.

00:23:33.000 --> 00:23:37.000

I and I wrote on Skype to a friend of mine.

00:23:37.000 --> 00:23:41.000

He is an MVP as well. And I said, Hey, I have this problem.

00:23:41.000 --> 00:23:48.000

Do you know how to solve it? He call it me after 2 min, and in 10 min we solved

00:23:48.000 --> 00:23:54.000

everything. So this is another important stuff, networking not only with, MVP

00:23:54.000 --> 00:24:02.000

Or GDE, but also with other people, of course, but, as an MVP

00:24:02.000 --> 00:24:11.000

The other have a lot of knowledge. So, and and it's good to be a part of this community.

00:24:11.000 --> 00:24:12.000

And can we be on whatever community. Can be GitHub Start. Just It's a the first important thing to, let's see, to learn, if you are, let's say, I don't know how to explain this, It's better to

00:24:12.000 --> 00:24:41.000

have friends with a lot of knowledge and you are the person who know less in the room because you learn a lot of stuff

00:24:41.000 --> 00:24:42.000

I have one professor here and he alway say: the important thing is not only to know, but also have the phone of the people who know.

00:24:42.000 --> 00:24:51.000

So, sometimes when you are on this networks you can get this help.

00:24:51.000 --> 00:24:56.000

Yeah, exactly, okay.

00:24:56.000 --> 00:24:57.000

Or the email of the people that know.

00:24:57.000 --> 00:24:59.000

00:24:59.000 --> 00:25:01.000

Yeah, yes, yes. Exactly. Okay, So we are open to questions or opinions, and are coming from the the attendees.

00:25:01.000 --> 00:25:13.000

So

00:25:13.000 --> 00:25:32.000

So if any one of you wants to ask any questions or do any comments, or have any doubt about rOpenSci, the champions program or about the experience of Emanuele and Santosh, please this just share it, raise your hand, and

00:25:32.000 --> 00:25:39.000

Hey, Can I answer a question from. Yes, from the google doc, yes please.

00:25:39.000 --> 00:25:46.000

They say. Do you have any recommendations to apply to these kinds of programs?

00:25:46.000 --> 00:25:55.000

I think your first goal is not to apply to one of these programs, but start to do

00:25:55.000 --> 00:26:02.000

what do you love to do, like sharing posts and big videos?

00:26:02.000 --> 00:26:09.000

I don't know. Instagram. I don't know, Tiktok, or whatever.

00:26:09.000 --> 00:26:16.000

And then you can apply, but not because you can't, because, first of all, you have to.

00:26:16.000 --> 00:26:20.000

Let's see. You have to start with this content creation.

00:26:20.000 --> 00:26:29.000

and activities, because you want to do, and not because you want to become an MVP

00:26:29.000 --> 00:26:45.000

or Github Star, or a and Ambassador, because this is the most important to think, because, say time to time, you don't have the motivation to create a blog post for a month.

00:26:45.000 --> 00:26:50.000

for instance, so it's not easy. Let's see.

00:26:50.000 --> 00:26:51.000

Yo have always a motivation. But if you find your motivation in the let's say in do what you love is more easy.

00:26:51.000 --> 00:26:59.000

00:26:59.000 --> 00:27:04.000

Of course, so start with what you love to do.

00:27:04.000 --> 00:27:22.000

This is my only recommendation honestly, and then you can apply to the program like become a GitHub Star, honestly, from my experience becoming a MVP, is more easy that to become a GDE.

00:27:22.000 --> 00:27:26.000

For instance, because we are more people,

00:27:26.000 --> 00:27:38.000

we are more, like 4,000 for what I remember, and but it is a little bit more easier than

00:27:38.000 --> 00:27:45.000

the GDE program, for instance, GitHub Star is, I'll say, it's more, almost impossible because we are, and correct me

00:27:45.000 --> 00:27:51.000

If I'm wrong, we are 100 in this moment.

00:27:51.000 --> 00:28:01.000

But when I join the program, in February we were a and 80, if I remember more or less 75, so.

00:28:01.000 --> 00:28:10.000

But yeah, it's always. It was a surprise for me, because I never apply it for a GitHub Star.

00:28:10.000 --> 00:28:21.000

But other people apply me and I ask you to the people that are responsible of the, for the program

00:28:21.000 --> 00:28:24.000

I say, hey? Why I am I GitHub Start now?

00:28:24.000 --> 00:28:28.000

Because I don't have any. Let's see, famous repository or stuff like that.

00:28:28.000 --> 00:28:42.000

but it's because I started to talk about GitHub Code Spaces, one year and a half ago more or less, and they told me, Hey, you spoke more than us, about GitHub code spaces

00:28:42.000 --> 00:28:49.000

so, this is why you are a GitHub Start, and I have also maybe 2 or 3 sessions until the end of the year.

00:28:49.000 --> 00:28:50.000

about code spaces as well, because now I'm a kind of expert over GitHub codespaces, so, everyone call me. Oh,

00:28:50.000 --> 00:28:58.000

Cool.

00:28:58.000 --> 00:29:05.000

Yeah, you know GitHub codespaces. Well, come on, you have to talk about it in my event.

00:29:05.000 --> 00:29:06.000

Okay, Santosh related with this question, that Emanuele take there is another one.

00:29:06.000 --> 00:29:13.000

00:29:13.000 --> 00:29:20.000

He's saying. Curious why content creation is important to be an open source community leader.

00:29:20.000 --> 00:29:24.000

yeah, that's yes, sure. Sure. That's a very good question.

00:29:24.000 --> 00:29:28.000

I mean, why right? I mean, why should you create the content and why it is so important?

00:29:28.000 --> 00:29:32.000

So all these communities which are out there. For example, if I talk about MVP, GDE

00:29:32.000 --> 00:29:38.000

Or GitHub Stars, or even this community, right? What we need is, we need someone who can teach other

00:29:38.000 --> 00:29:46.000

people, that's how you grow the community, right? I mean, if you know, and then you create your content, which actually helps other 10 people to actually learn something new

00:29:46.000 --> 00:29:49.000

That's what that's is what matter

00:29:49.000 --> 00:29:58.000

That's what matters to the community. As Emanuele mentioned, he was recognized as Github Star because he was already creating content around GitHub Code spaces.

00:29:58.000 --> 00:30:06.000

There are instances where even the core team doesn't know much about the product they are building, or because, like, if there's a product like Code spaces, right?

00:30:06.000 --> 00:30:10.000

Which is very, of course, very, I would say amazing product, right?

00:30:10.000 --> 00:30:26.000

I mean, you can just click a dot, I mean, and then you will just have your self-hosted code instance, and you are working on. It There are like probably 100 or 200 people team which is working on this and all those 100 people don't know all the features.

00:30:26.000 --> 00:30:31.000

So community members like Emanuele, who is actually exploring new features and telling the world that

00:30:31.000 --> 00:30:37.000

this is also possible, this is also possible, because those possibilities is actually not known to the team.

00:30:37.000 --> 00:30:51.000

It only is known when someone like Emanuele goes ahead, explores the product and writes about it, and then, he creates those extra quality content which is like teaching other 100 people about that product.

00:30:51.000 --> 00:31:05.000

So that's why content creation matters to everyone, even if you go to Google for GDE program, they have GDE program for all the technologies, almost all the technologies which exist within Google they have the GDE program, So why they are recognizing people right?

00:31:05.000 --> 00:31:22.000

Because let's talk about Angular. For example, for instance, if I'm creating some content on Angular, there are, it is helping the team, because the team, the core team, which is not a very big team, it's around 35, 40 people, if you don't know, the entire Angular team is like not even 40

00:31:22.000 --> 00:31:26.000

people, which includes developers, and deb advocates as well.

00:31:26.000 --> 00:31:33.000

So probably, developers are like 30. Those 30 developers cannot just keep pushing the features as well as the content out.

00:31:33.000 --> 00:31:36.000

That's where the community members come into the picture. The GDE

00:31:36.000 --> 00:31:43.000

is come into the picture. So they are actually going. They're going ahead exploring the features, or let's say, take any Ps.

00:31:43.000 --> 00:31:48.000

Which is like introducing a new feature, come up with the new possibilities.

00:31:48.000 --> 00:31:53.000

Those are the contents which actually team wants right, but they can not do it by their own.

00:31:53.000 --> 00:32:08.000

So all the community members actually creating those content are teaching something new to probably thousands of other people. So, that is why content creation is so important, because it is helping to that product aspect.

00:32:08.000 --> 00:32:24.000

Yeah, I will. I will add there that some of these programs you can't apply actually, other people has to propose you. For example, GitHub Stars is like that I joined this year, too, and why people

00:32:24.000 --> 00:32:40.000

will propose you?, because they know you from somewhere, how they know you, because you create content that is useful for them, and why you should do that? I never create content with my goal to be a GitHub Star, Emanuele say it,

00:32:40.000 --> 00:32:43.000

you don't start this with that goal in mind.

00:32:43.000 --> 00:32:50.000

I did it because I want people can learn and use this technology.

00:32:50.000 --> 00:32:55.000

So, and I love R, and I love coding, and I love, so

00:32:55.000 --> 00:33:12.000

that is why I started to share this to share you to learn, and as a consequence, some people really like what we do and propose us there, and some other people think that is okay, Yeah, this is good content and they should be.

00:33:12.000 --> 00:33:17.000

champions or stars, or ambassadors rom this program.

00:33:17.000 --> 00:33:20.000

So it's kind of that. That is what I say at the beginning

00:33:20.000 --> 00:33:27.000

That the goal of this champions program is identifying and reward leaders of the community.

00:33:27.000 --> 00:33:28.000

It is a way to support all the effort that you already do for free in your free time. And so, it's a way to recognize, to take that, and I give an organization space, and some resources so you can do it, and you can learn more in the.

00:33:28.000 --> 00:33:47.000

path of doing that.

00:33:47.000 --> 00:34:01.000

And in addition, a lot of friends of mine told me, Hey, I would like to start with blogging or share something, but I don't have anything to share, because I'm a beginner because I don't know.

00:34:01.000 --> 00:34:26.000

I don't have, let's say, a lot of knowledge, but you have to share your experience, especially if you start, for instance, to study, React, Okay, start to share your journey, starting React, because it's useful for other people to understand how to start for instance, and not only how to use it in a super project

00:34:26.000 --> 00:34:33.000

without. I don't know. But it's also important to share your journey.

00:34:33.000 --> 00:34:39.000

Your experience, not the, let's say, the truth about React, because no one knows

00:34:39.000 --> 00:34:46.000

the truth about React, about Angular, about something else, but the journey is important.

00:34:46.000 --> 00:34:50.000

Oh, oh, let's say: how I become a speaker in 2022.

00:34:50.000 --> 00:34:57.000

I don't know something like that, let's see. I'm writing a blog post,

00:34:57.000 --> 00:35:00.000

I think I will post the next. Let's see.

00:35:00.000 --> 00:35:10.000

The next week, because this week I don't have time, and I have another post, right? and the the title is

00:35:10.000 --> 00:35:15.000

How I prepare my session for the event.

00:35:15.000 --> 00:35:18.000

Okay, and it's How I prepare the session.

00:35:18.000 --> 00:35:25.000

Maybe it's not. Let's say, useful to the 90% of the people, but because I haven't, like my own meetup

00:35:25.000 --> 00:35:38.000

But maybe for someone is useful, because to say, it is the first time they try to prepare a session, and I would like to share my experience. Another post

00:35:38.000 --> 00:35:43.000

Another post is, How do I use my widescreen as a developer?

00:35:43.000 --> 00:35:50.000

Okay, because I use a widescreen, no three monitors like the real hackers

00:35:50.000 --> 00:36:04.000

Ok, I use a wide monitor. And I also, let's say, share my experience about using a fancy zone with power tools and stuff like that.

00:36:04.000 --> 00:36:16.000

So you can share whatever you want. Not only again the truth about the technology or the smartest blog post in the world.

00:36:16.000 --> 00:36:22.000

Sometimes I spend, maybe, let's see, 50 min to write a post, and sometimes I spend one our and a half.

00:36:22.000 --> 00:36:33.000

It depends, on the blog post. For instance, yesterday I wrote the blog post, about how to generate random numbers with .36.

00:36:33.000 --> 00:36:37.000

It's very easy. Okay, fine line of code.

00:36:37.000 --> 00:36:48.000

But just today, I did maybe 1,000 views, because, hey, it very, says useful, and it is not the common.

00:36:48.000 --> 00:36:54.000

Let's say, way to. Let's say, to create random numbers.

00:36:54.000 --> 00:36:55.000

But just with the crypto stuff. But I spent 50 min I copy and paste my code from my project

00:36:55.000 --> 00:37:04.000

in the blog post and share,

00:37:04.000 --> 00:37:29.000

Okay, this is the new way to create random numbers, so it is not important to create a blog post in 3 h of work or again, the about the truth behind react or ... this just starting with the what do you love, honestly and

00:37:29.000 --> 00:37:41.000

Oh, it's a very, it's a very good advice Emanuele, about this, because some of us, especially when we start and you feel this imposter syndrome, you mention, of this idea of

00:37:41.000 --> 00:37:42.000

What I have to share? Actually, we have a lot to share, and the thing is to take the step to show that to the world, sometimes they world is going to be 3 people.

00:37:42.000 --> 00:37:54.000

Cool.

00:37:54.000 --> 00:37:55.000

Sometimes going to be 1,000 view. We don't know but it is still perhaps this idea that we don't have to do a book.

00:37:55.000 --> 00:38:02.000

Okay.

00:38:02.000 --> 00:38:16.000

You don't have to have a book before to publish something, and some of simple things that you do are also useful for many people, and what is going to make you a leader

00:38:16.000 --> 00:38:24.000

Or someone that people will look at in the community is actually your willingness to share simple stuff.

00:38:24.000 --> 00:38:25.000

Or how do you do these things that perhaps there is not technical, but it's pretty good.

00:38:25.000 --> 00:38:30.000

00:38:30.000 --> 00:38:32.000

You also know, Okay, how How do you handle your desktop, or how do you organize some stuff.

00:38:32.000 --> 00:38:39.000

Yeah.

00:38:39.000 --> 00:38:51.000

So Thank you. Thank you so much for that. But I think it is important to encourage us to share what we do, and that we don't have to do really complex stuff to share with the world.

00:38:51.000 --> 00:39:03.000

I see other questions on the shared document. Some people ask for recommendations on how do you know about these possibilities?

00:39:03.000 --> 00:39:10.000

How do you know about this program of this chance? Do someone invite you?

00:39:10.000 --> 00:39:11.000

Do you read it be in some places? Do you follow some people?

00:39:11.000 --> 00:39:16.000

How do you know about these chances?

00:39:16.000 --> 00:39:21.000

I can answer, Santosh, from my experience.

00:39:21.000 --> 00:39:35.000

about, I discovered MVP program maybe 10 years ago, more or less participating at events, and I see a lot of speakers that's told, hey

00:39:35.000 --> 00:39:38.000

I'm a Microsoft MVP. I say, Okay, what is a Microsoft MVP?

00:39:38.000 --> 00:39:46.000

Then you'd search with Google, oh sorry, I should say, I search with Bing

00:39:46.000 --> 00:39:51.000

And what is it this MVP, and I just discovered what is

00:39:51.000 --> 00:40:00.000

a to be an MVP, and okay. Now, maybe I'd like to become an MVP as well, and It took me maybe 2 years.

00:40:00.000 --> 00:40:24.000

I and have an MVP, but also that at the moment was a kind of surprise for me, because again, at the beginning, I start to share my knowledge about Windows phone. I've developed app at Windows phone and ... call it's because it is too much recent.

00:40:24.000 --> 00:40:52.000

it's recent. And yeah, my first session in public was in, 10 years ago, exactly 10 years ago in December, about SQL Lite and the speed of ... and the I don't know anything else about SQL Lite but a friend of mine calling me on skype

00:40:52.000 --> 00:40:56.000

and asking me, Hey, do you want to deliver a session about

00:40:56.000 --> 00:41:01.000

SQL Lite? Do you know what is SQL Lite?

00:41:01.000 --> 00:41:26.000

No; but I can study in one month, and and after one month, I did even a session about SQL Lite and ... Yeah, so this is my first experience, and and I started with the small meetups at the beginning, like 10 to 20, people maybe in my own town in Tuscani in Italy in

00:41:26.000 --> 00:41:36.000

and then, after one year, I spoke. In one of the important, most important events in

00:41:36.000 --> 00:41:48.000

Italy, call it BPC. And I don't remember if I were, if it was an MVP or not, the first time, maybe not.

00:41:48.000 --> 00:41:58.000

But after 2014 I was, let's say, awarded as an MVP.

00:41:58.000 --> 00:42:04.000

After two years of public speaking, blog posting, and stuff like that.

00:42:04.000 --> 00:42:10.000

So yeah, if you want to do some

00:42:10.000 --> 00:42:19.000

public speaking, start to meet the small meetups because it's not easy to speak in front of

00:42:19.000 --> 00:42:31.000

speak in front of lots of people. It is not really really easy, but if you start with these small meetups, that's, of course, it's a kind of gym, you know.

00:42:31.000 --> 00:42:35.000

You have to train. You have to train your speaking

00:42:35.000 --> 00:42:46.000

You have to train in your skills about public speaking; because if I try to watch, one of my old session

00:42:46.000 --> 00:42:58.000

Maybe I stopped the video after two minutes thinking this speaker is a he's not good .... [laught] oh, well, it's me [laught]. But yeah.

00:42:58.000 --> 00:43:07.000

Because also now I'm not the best speaker in the world, but people don't know that [laught]

00:43:07.000 --> 00:43:12.000

But yeah, start with the smaller meetups.

00:43:12.000 --> 00:43:21.000

Local meetups or so. And then, after a while, you start to be invited to other events.

00:43:21.000 --> 00:43:28.000

For sure, because they say, ok you did maybe 4 meetups at your local meetups, they will say.

00:43:28.000 --> 00:43:39.000

do you want to become a speaker at our event of 100 people

00:43:39.000 --> 00:43:46.000

and you can deliver a good session. Santosh anything you want to add?

00:43:46.000 --> 00:43:49.000

that's true. I mean, so the recommendation also applies to programs. Right?

00:43:49.000 --> 00:43:54.000

So I think this goes both ways I'm pretty sure that

00:43:54.000 --> 00:44:00.000

okay, the programs also have to recognize the people. Right? So it's not like you are the one who is taking the first step.

00:44:00.000 --> 00:44:13.000

I think programs also should come to you in case you are doing much work trying to recognize you. For example, in my case, when I became a GDE I was not aware of the GDE program, right? I was just doing, must have, and then they figured out, Okay, this person.

00:44:13.000 --> 00:44:16.000

is actually doing this, so let's reach out to him.

00:44:16.000 --> 00:44:25.000

But the important factor here is to keep doing the stuff you love. I mean, don't do it just because you want to become a GitHub Star or you want to be an MVP.

00:44:25.000 --> 00:44:27.000

Or you want to become a GDE. That should not be your goal, right?

00:44:27.000 --> 00:44:31.000

I mean that it's okay. It's good to have, what you can say,

00:44:31.000 --> 00:44:36.000

It's good so to have some ambitions. So this can be your ambition that becoming an MVP

00:44:36.000 --> 00:44:41.000

or GDE. But that should not be your goal. Your goal should be like, okay, I want to give back to the community.

00:44:41.000 --> 00:44:46.000

And if you do that, I'm sure you will be part of hundreds of programs like this.

00:44:46.000 --> 00:45:06.000

People will reach out to you and say, Please join our community, and let's grow together, so you don't have to make effort in case that's not your goal. That is the ambition part. Give back to the community and you will be amazing for the result you will see.

00:45:06.000 --> 00:45:14.000

Okay, thank you. I have some questions about the rOpenSci Champions Program.

00:45:14.000 --> 00:45:21.000

one of the questions says is working around amplifying and improving an already developed.

00:45:21.000 --> 00:45:28.000

package or adapting to our functions from other platforms viable for the program?

00:45:28.000 --> 00:45:38.000

Well, you need to choose one of the three options to develop a new package, to go through the review process with one package.

00:45:38.000 --> 00:45:48.000

you already have, or to be, a reviewer. The part of working around amplifying and improving is one of the things that you can do for the next.

00:45:48.000 --> 00:45:57.000

For the next group, for the next call, for the next year, we are going to add the option to take

00:45:57.000 --> 00:46:03.000

the maintenance, or to become part of one of the maintainer's groups of other packages.

00:46:03.000 --> 00:46:17.000

But we don't have this year, because we need to create which package we need maintainers, or which package the maintainers want to help with, and we need to create a list of that and see

00:46:17.000 --> 00:46:21.000

how we onboarding you as a new maintainer.

00:46:21.000 --> 00:46:34.000

So for this year we have these 3 options, but the idea of adapting to our functions for another platform that could be a new package, so that can be part of the point number

00:46:34.000 --> 00:46:54.000

one. So if you already have an idea, this function for my discipline, for what I do are useful, are only on Python, and I want to create this package to do that, do this Python stuff, then you can propose for the first option of project to develop

00:46:54.000 --> 00:47:00.000

a new package and that helps me to answer the other question, which says, what is a "solid idea"?

00:47:00.000 --> 00:47:05.000

Thank you. Please define "solid idea", Yani.

00:47:05.000 --> 00:47:11.000

The thing is that you at least need to have an idea of what the package should do.

00:47:11.000 --> 00:47:30.000

If this is part of data from an institution, you need to have or work for that institution, or to have permission to use that data to access those data and to have an idea of what the package will do with those data, so what are, at least, what are the functions, and what is the goal of the

00:47:30.000 --> 00:47:34.000

package. You don't need to have anything right yet.

00:47:34.000 --> 00:47:43.000

You can start. That's why the program is one year; you're going to have one year to develop this with mentorship and with training to

00:47:43.000 --> 00:47:48.000

Because we want you are successful in your project.

00:47:48.000 --> 00:47:56.000

but if you write an application, say, I really like to build a package, but I don't know what. That is

00:47:56.000 --> 00:48:06.000

not a solid idea. But if you say you know what, Yani, I would really like to write a package to access this census data on my country that today doesn't exist.

00:48:06.000 --> 00:48:20.000

And I want to that package also have some functions to deliver the basic stats and to export this data to different formats.

00:48:20.000 --> 00:48:31.000

And I have already talk with my official institution of the census, and they say, yes, you can do it. That is a solid idea for a package.

00:48:31.000 --> 00:48:35.000

So anything. If you have something that you start for your PhD.

00:48:35.000 --> 00:48:41.000

for your for master, for your work, and that can be open and put on a package

00:48:41.000 --> 00:48:49.000

that is also a solid idea. If you have some processes that you need and say, okay, this can be useful for other people.

00:48:49.000 --> 00:48:57.000

well, and I have several functions around an R project, and I want to create a package with that.

00:48:57.000 --> 00:49:02.000

That's that is a solid idea for a package. But your need to have this.

00:49:02.000 --> 00:49:09.000

we can't, at least for this group, provide with package idea.

00:49:09.000 --> 00:49:31.000

We can try to survey some package idea for the next one, so we can put together people who need someone who develops a package and people who wants to develop a package together, but for this time you need to provide the idea, and you need to have, if it is data from our official institution, you

00:49:31.000 --> 00:49:38.000

need a list to have the permission, or if it is already open data, and you say, okay, I will use this.

00:49:38.000 --> 00:49:43.000

we create a wrapper for this API, so you can download and process the data.

00:49:43.000 --> 00:49:52.000

That is a solid idea for a package, too. And it is the kind of package that we have at rOpenSci, too.

00:49:52.000 --> 00:49:58.000

I see some people doing this (nodding). So, perhaps I answer, but please let me know if I don't answer

00:49:58.000 --> 00:50:03.000

or you need more details.

00:50:03.000 --> 00:50:17.000

and I have another another good, let's say, point to become part of the programs, because I stopped to buy T-shirts.

00:50:17.000 --> 00:50:18.000

And goodies for years, or 5 years ago, because I have a lot of free T-shirts.

00:50:18.000 --> 00:50:22.000

[laughs]

00:50:22.000 --> 00:50:35.000

I know this [laughs]. But like this T-shirt: Yeah, Yeah. My T-shirt says Hacktoberfest.

00:50:35.000 --> 00:50:48.000

So I can maybe, what I have to do, and what I have to buy is just something for the legs, because for

00:50:48.000 --> 00:50:49.000

t-shirt you are done, but and also for a ads point of view.

00:50:49.000 --> 00:50:53.000

I love this stuff.

00:50:53.000 --> 00:50:58.000

Your, You have a lot of stuff, and the gadgets as well.

00:50:58.000 --> 00:50:59.000

I have a lot of visual studio code logos, just for free.

00:50:59.000 --> 00:51:09.000

so, this is another important thing [laught]

00:51:09.000 --> 00:51:18.000

That's cool, that's cool Emanuele. I think that for or the rOpenSci champions program and completely biased here

00:51:18.000 --> 00:51:27.000

of what I'm going to say, but we want to support groups that are usually excluded from the open-source movement.

00:51:27.000 --> 00:51:49.000

so we are going to focus this in place from Latin America, from Africa, from Asia, for people who usually aren't part of this and one of the things that I think that many people from this vision can

give back after the program is to create content in their languages, so we know that English is a huge

00:51:49.000 --> 00:52:00.000

barrier. So I really hope we have bilingual or trilingual champions, and then can create content to be consumed in the language of the people of their country or their region.

00:52:00.000 --> 00:52:08.000

So, that is something that I hope we can achieve with this champion program

00:52:08.000 --> 00:52:14.000

and have some cohorts in other languages than English, that we can do

00:52:14.000 --> 00:52:18.000

the training and the mentoring, and the creation of the content

00:52:18.000 --> 00:52:42.000

in our languages, from our country and our places, so that is also I hope that we can achieve this, so that that is also a way to low this barrier, to entry to to the world of the open source community into the R community and to be a developer of the technology and not

00:52:42.000 --> 00:52:48.000

only users. We can do it. There is a lot of talent around there, and we want to provide the scaffolding

00:52:48.000 --> 00:53:06.000

the training and the space to do it. Not alone, as Emanuele and Santosh already say, but with other people who know, I can go with you and learn with you and teach you to to create these tools.

00:53:06.000 --> 00:53:09.000

Okay for Yani, say, can you talk more about being a mentor?

00:53:09.000 --> 00:53:21.000

yes, the ... we are looking for mentors. So Mentor has to be people who already know how to develop a package or how to be a reviewer.

00:53:21.000 --> 00:53:34.000

so if you go through with some roles through the review process of rOpenSci, it is a plus because you already know how to do this with us.

00:53:34.000 --> 00:53:38.000

And the idea of the mentors is people who are going to help the champions.

00:53:38.000 --> 00:53:41.000

You are going to help us to select the champions.

00:53:41.000 --> 00:53:47.000

You are going to review and evaluate the applications and say, Okay, this is a good idea.

00:53:47.000 --> 00:53:54.000

We are committed to give feedback to every single one of the people who apply.

00:53:54.000 --> 00:53:58.000

So we are going to tell the people, why yes, why not.

00:53:58.000 --> 00:54:04.000

So you know how to improve for the next call, in case you are not chosen.

00:54:04.000 --> 00:54:27.000

We are going to try to offer also some kind of training, and I'm thinking about that and trying to figure out how what we can offer to every one of the people who apply that is useful for everyone, and then the mentor will connect, give feedback, and with their many and you can choose what kind

00:54:27.000 --> 00:54:33.000

of project. You can be a mentor. So, for example, you say, Okay, I feel comfortable

00:54:33.000 --> 00:54:47.000

If I will mentor someone who will be a reviewer, but not if someone will develop a new package, so you can choose all the projects or the one you feel more comfortable, or you can help more.

00:54:47.000 --> 00:54:55.000

We think that you will need an average of 2 hours a month to be a mentor.

00:54:55.000 --> 00:55:01.000

So we ask you to meet with your mentee at least one time a month by 30 min.

00:55:01.000 --> 00:55:10.000

We are going to train you. We are going to provide training about the logic of the program and about how to be a mentor,

00:55:10.000 --> 00:55:15.000

How that is different of to be a tutor, or a boss, or a professor because it is different.

00:55:15.000 --> 00:55:28.000

So we are going to provide that. And then the benefits of the mentor, the prime benefits, is to give back, actually to help someone to become an active contributor.

00:55:28.000 --> 00:55:42.000

But then you are going to have the chance to be with other mentors, to learn how to be a mentor, to increase your contact network, not only with mentors, but also with the champions community, and to participate in this other space.

00:55:42.000 --> 00:55:51.000

So I hope that also many people want to become mentors of our champions. Champions and mentors

00:55:51.000 --> 00:55:58.000

will have my support during the full program. So I'm going to be there bugging you

00:55:58.000 --> 00:56:08.000

and helping you. I hope I'm sharing with you some time, so you can do the best of your role, too.

00:56:08.000 --> 00:56:16.000

So Yes, you can apply for any of the roles. Mentors

00:56:16.000 --> 00:56:25.000

we already ... there are people who know how to develop a package and how to do a review, a peer review

00:56:25.000 --> 00:56:31.000

Okay, we are almost there. Okay, time flies. I want to

00:56:31.000 --> 00:56:40.000

thanks a lot to Emanuel and Santosh for being here so late, to share you insights and your experience. Thank you.

00:56:40.000 --> 00:56:59.000

Thank you very much. As a GitHub star buddy, I really appreciate you saying yes when I propose these, and thank you so much to everyone who is here for your questions for your comments.

00:56:59.000 --> 00:57:03.000

I hope you apply to the champion program.

00:57:03.000 --> 00:57:06.000

You have my contact, and you have my calendly.

00:57:06.000 --> 00:57:11.000

If any one of you needs one of one chat, any one of you needs feedback

00:57:11.000 --> 00:57:14.000

We have co-working session. November.

00:57:14.000 --> 00:57:44.000

one, so you can show up there for 2 hours. We are going to be working on applications for mentors or champions, and if you need any other feedback or you have some questions if you want to chat

00:57:45.000 --> 00:57:46.000

about the community, please book a meeting with me and we are going to try to help you to do the best application

00:57:46.000 --> 00:57:57.000

you can do so you can be part of the champion program. Yes, Thank you very much for invited me. Thank you Yanina, I love to do stuff with the community, I always in for anything like this.

00:57:57.000 --> 00:58:04.000

Awesome awesome. Thank you so much. Okay, we are going to publish the video and the document.

00:58:04.000 --> 00:58:11.000

The document will be open for a few more days. So you want to edit the comment, to add some resources to do some more question.

00:58:11.000 --> 00:58:22.000

We are going to answer anything that was left, and we are going to tweet when everything's ready on on the web page, so you can

00:58:22.000 --> 00:58:27.000

access, after this time. Thank you so much one more time. Thank you, this was my first community

00:58:27.000 --> 00:58:31.000

call as a community manager. So was awesome, too, so Thank you.

00:58:31.000 --> 00:58:40.000

Thank you so much to all of you for being here.
