  - Xtext integration (and Yakindu issue)
  - EVM Adapters
- Examples repository usage
- Release planning

Minutes

- Wiki update
  - See table for list of pages and needed changes
    - Review needed for migrated pages
    - Update if needed for CEP and DSE parts
- Website update
  - Looking for candidate to pimp out starting page
  - Minor issues already taken care of (thanks Zoli!)
- Xtext integration
  - Got a proposed patch from Xtext team
    - Under evaluation
  - Probably we will use resampling at given points in the lifecycle
  - Planned for 1.3 timeframe
- EVM adapters
  - Internal review done, merged into master
  - Should not affect any basic users of EVM or VIATRA transformations
    - Except batch transformation initialization
- Wizard for creating VIATRA transformations
  - Please review if you have some time (by trying it)
- Usage of examples repository
  - Tests depend on examples, but tests may be better located near code
- Release planning

- https://projects.eclipse.org/projects/modeling.viatra/releases/1.2.0/plan
- Only bugs should be fixed after M2 in RC
- IP log is incorrect at the moment
    - We can't send it for review until they are fixed
    - This will probably delay the release by a few weeks until we get all the paperwork done
