

Our plan has two components:

1. Educators with a teaching degree complete a field placement experience as a part of their instructional program for certification. When the Plan II program was established, the Advisory Committee highly recommended waiving the field placement for existing teachers. Teacher candidates do complete the field placement rubric along with their CTE Director and provide a copy of their current teacher evaluation.
2. Teacher candidates coming from Business/Industry currently complete a 60-hour minimum field experience under the direction of a highly qualified CTE Teacher in their "V" code area. These placements are closely monitored and may require special attention to ensure placement in their "V" code.
