

An Amazing Trip to France!

Have you ever been to France? Well it is incredible! When my family went, we went to a place called Brittany. At the place we stayed we got to see the beach. In France the tides are very big. When it is high tide the water goes all the way to the top of the beach. When it is low tide the water goes out so far! In France there are huge granite rocks. When it is low tide you can see all the granite rocks. My brother and I loved to climb them. My family also went to Paris. In Paris we saw the Eiffel Tower. The Eiffel Tower was so big! I loved seeing it. When we got there the perimeter was closed off, although you could look around it. In Paris we also saw some stadiums for the Olympics. So many things were closed off because of that. It was still such a cool experience. My favorite food there was the nutella crepe. It was so good. All my other family members ate crepes also. They were so good. Basically that was all we ate. Overall, France was amazing. If you haven't gone you should visit!
