

A vibrant illustration featuring four stylized orange faces at the bottom, looking upwards. Above them is a large, dark, irregular shape filled with a dense collection of colorful icons. These icons represent various themes: nature (flowers, leaves, clouds), technology (a smartphone, a laptop, a lightbulb), human emotions and health (a heart, a pill, a brain, a question mark), and everyday life (a coffee cup, a pencil, a key). The overall composition suggests a collective gaze towards a complex, multifaceted world or a shared experience.

ALL ARE WELCOME !!!!

Each week during the fall and spring semesters, the ATLAS Colloquium features dynamic speakers from academia and industry who work in fields of interest to the creative technology and design community. Whether artists, creatives, scientists, researchers, entrepreneurs or free spirits, these speakers share their interdisciplinary experience and knowledge in an intimate, small-group setting. We promote rigorous, curiosity-driven investigation in a thriving academic community that is supportive, energetic and playful.
