

GET CREATIVE FOR RESTORE NATURE NOW

We have heard that people are making hand held willow models of Creatures of the Deep, mushrooms for the woodland, and even a Marching Meadow. But you don't have to be a master maker. We've got instructions to suit a range of abilities and we'll be adding to this list in the next few weeks.

TOP TIP: it all needs to be small and light enough to be hand-held on the march.

Who doesn't love a pair of scissors and a bit of pva glue, paint and a chance to dive into the recycling bin?

We love these jelly fish which could be made with almost anything really and attached to bamboo canes to carry in the air.

Or perhaps you prefer owls.

There is a group who have created some YouTube videos for making wearable animal sculptures.

Here are the links, which might inspire and help you get started:
