Kerangka 2

1. Introduction

The introduction comes at the start of a piece of writing. It introduces the research by situating it (**by giving background**), presenting the research problem and saying how and why this problem will be "solved." Without this important information the reader cannot easily understand the more detailed information about the research that comes later in the paper. It also explains why the research is being done (rationale) which is crucial for the reader to understand the significance of the study.

The structure: Ketik saja pointers nya ya Gaes, nanti lebih detail di bagian berikutnya

Aspek	Pointer/Unsur penting
(Background)	a. What is the context of this problem?
	b. In what situation or environment can this problem be observed?
(Rationale/justification)	c. Why is this research important?
	d. Who will benefit?e. Why do we need to know this?
	f. Why does this situation, method, model or piece of equipment need to be improved?

(Problem Statement)	g.	What is it we don't know?
	h.	What is the gap in our knowledge this research will fill?
	i.	What needs to be improved?
(Objectives)	j.	What steps will the researcher take to try and fill this gap or improve the situation?
(Scope)	k.	Is there any aspect of the problem the researcher will not discuss?
	1.	Is the study limited to a specific geographical area or to only certain aspects of the situation?
