

# Wormhole

[XD Mods Docs](#)

[Engulf](#) addon that allows Vouchers, Booster Packs, Tags and all consumable types to appear with Editions.

As with regular Engulf, mod developers can create custom functionality for their Consumables and Editions. Editioned items also have their price increased and are rarer. If any non-Planet Card levels up Poker Hands, its Edition is also applied to said Poker Hands.

If an item creates other items (eg Judgement, Incantation), they usually will have the same Edition as the creator.

## Editioned Vouchers

If a Voucher has an Edition, it is applied during scoring as if it was on a Joker.

**Negative** Vouchers give +1 Voucher Slot when redeemed.

## Editioned Booster Packs

Based on Cryptid, Booster Packs with Editions apply their Edition to all of their contents.

## Editioned Tags

Tags with Editions create their corresponding Edition Tag when they activate.

If there is no corresponding Edition Tag, the player earns triple the Edition's cost increase as money.

## Other Consumable Types

Each consumable type has specific functionality when Editioned, usually applying it to specific Poker Hands.

### **Tarot Cards**

Apply Edition to a random Poker Hand

### **Spectral Cards**

Apply Edition to most played Poker Hand

### **Code Cards** (Cryptid CM)

Apply Edition to Poker Hand with highest level other than most played Poker Hand

### **Default**

Apply Edition to last Poker Hand played this run
