

**We have a new site: <https://www.tftanomalies.com>**

**This Doc is going into legacy mode. All updated content will be on the website for future patches (give it a bit of time).**

**Last Update: Dec 10, 2024**

**The best units to anomaly are typically whoever the main focus of your comp is. Anomalies are pretty much hero augments except you always get it at 4-6 and you can spend gold to reroll. There are currently 58 anomalies (Navori & Miniaturize are disabled) and rerolling doesn't show repeats.**

**This doc is based on the opinions/observations of just one person(me)... there are things I'll be wrong about, but I think I generally do a good job**

### **Anomalies that are generic enough to be picked often:**

Anything here can go on any unit that would correspond (tank on any tank, etc.)

- Calling Card (If you are fishing for some emblem)
- Dual Wielding (If you want to put items onto an additional carry)
- Fireball (just put this on a backliner, it's better on visionaries/units with mana items but its generic enough)
- Dramatic Entrance (on any frontliner as long as your frontline will last more than 6 sec without it)
- Giant Sized (Main tank)

- Stoneskin (Main tank)
- Thornsken (Main tank)
- Bulwark (Main tank)
- Slow Cooker (Main tank)
- Protective Shielding (Main tank)
- Legacy of Shurima (Main tank or main carry)
- Defense Expert (Main tank)
- Fortified (Main tank)
- Scuttle Familiar (Main tank)
- Avarice Incarnate (Main carry)
- Comeback Story (Main carry)
- Bully (Main carry if 3\*)
- Freestyling (Main carry if you have 7+ traits)
- Headhunter (Main carry)
- Hypervelocity (Main carry if they cast frequently)
- The Finisher (Main carry)
- Attack Expert (Main carry if AD)
- Wolf Familiar (Main carry if AD)
- Berserker Rage (Main carry if Melee)
- Into the Unknown (Main carry if you can afford to send them away, otherwise secondary carry)
- Magic Expert (Main carry if AP)
- Nothing Wasted (Main Carry if caster)
