

Finn combo guide

This guide shows you how to perform a finn combo. A finn combo is a combo with all (relevant) positive effects.

Made by Hellranger_FL, contact him through discord if you have any questions.

With the help of: Fleur_bleue and _nyan.cat_

Warning: This is only allowed in the general ruleset and should be done with at least sexvigintillion cbat.

Setup

You should look for a seed with lots of g!fthofs in a row, but make sure you have a sufficient amount of spells before that part, as you're gonna be casting a lot of sts. There should be an ef cf dualcast early on, so gfdss/gfdss until you're at that point.

For the garden use nursetulip + whiskerblooms. Freeze the garden a tick before the plants are mature.

You should have Vomitrax, Selebrak and Godzamok slotted in your pantheon.

After this, install cyol and get a golden sugar lump. After you get the sugar blessing buff, keep cycling to get a caramel lump.

Stacking first buffs

After you've done the setup, follow these steps:

1. Activate loans 1 and 3, along with sugar frenzy
2. Stack frenzy and dragon harvest via multitalbbing or gabagool
3. Slot in SI RB for the grimoire route
4. Export your save
5. Import your save
6. Wait until a natural golden cookie spawns
7. Activate loan 2
8. Stack ef cf df with the help of your grimoire, try to get as many sts (after you've gotten all buffs) and a DI in the route as possible
9. If you have messed up the grimoire exec/were to slow, repeat from step 5
10. Export your save
11. Move on to caramel lump abuse

Caramel lump abuse

1. Wait for the current caramel lump to auto harvest
2. Open the game, quickly buy 383 wizard towers
3. Refill your wizard towers
4. Slot in SI RB
5. Cast 6 sts with this route: 383 -> 183 -> 83 -> 43 -> 13 -> 3 (use other route if there's a glst success)
6. If any cast is a backfire, cast hc instead (or gfds)
7. Slot in DC RB
8. Cyol a caramel lump
9. Export save
10. Repeat from step 1

After your shortest buff is around 1 minute long, you can replace the first cast with SCP.
(optional; only a very tiny increase in cookies)

After your shortest buff is around 2 minutes long, you can try to stack EMG.
(optional; only a very tiny increase in cookies)

After your shortest buff is around 5 minutes long, try to stack a bit of Godzamok (slot it in diamond), slot in EB RA, activate gswitch, slot in mokal, and click the cookie while buying buildings (ignore grandmas, wizard towers and yous). Make sure a buff doesn't run out.

After your shortest buff is around 20 minutes long, move on to stacking bses.

Stacking bses

You can do one of these strats:

Standard caramel abuse

Warning: quite slow, but easy to exec

1. Do the caramel lump abuse, but gabagool a specific bs before step 5 (start from cursors, do wizard towers last)
2. Do standard caramel abuse until your shortest buff is 2 minutes long, then repeat step 1

CMUM deorl dupe streak prevented dupe bs

Warning: difficult to exec, requires a few lumps

1. Find a Deorl clone
2. Get 108 max mana
3. Wait for nat gc to almost spawn
4. Get a Deorl
5. Gabagool/CMUM them both to be the same bs (start from cursors, do wizard towers last)
6. When a bs is around 15-20 minutes long, go to the next one
7. Repeat from step 2 until the sugar lump refill timer is almost up
8. When the sugar lump refill timer is up, refill immediately, wait for 108 mana then exec this route (all sts, replace backfires with hc): 627 -> 316 -> 155 -> 75 -> 34 -> 13 -> 3
9. Repeat from step 2 until you have all bses

Final exec

1. Keep casting ST until your shortest buff is at least 5h long
2. gfdss/gfdss until you're at the g!fthofs you seed scouted for earlier
3. Make sure to have a caramel lump ready to be harvested
4. Get the nursetulip + golden clover setup if you haven't
5. Open the game and stack Godzamok until you are satisfied (30mins recommended)
WARNING: The Godzamok buff resets when you reload the game, so you will have to keep the game open until you're finished with the combo/fail the grimoire exec
6. Slot in Mokalsium - Muridal - Cyclius (use Jeremy if Cyclius has bad timing) (you can also use Cyclius in ruby if you want)
7. Slot in SI RB
8. Look for a clone that makes Lucky day! Appear
9. Wait for a deorl + lucky day (you can also just use nat + lucky day, slightly suboptimal)
10. Exec your grimoire route
11. Make sure to rebuy wizard towers
12. Slot in DFo RB
13. Click the big cookie for a "fuckton" of cookies
