

EnerGy ka na ba for Today's Video?

Name: _____

Score: _____

Direction: In this activity, you will create a 1-3-minute vlog demonstrating/showing how one source of energy produces or generates light, sound, heat, and electricity. You do not have to be outside your house then choose a source which is inconvenient of your time, effort, and money. Just look around your house and you'll surely find one. Showing your face on the video is encouraged. Use a language you are comfortable speaking. Please be guided by the following rubrics.

	8-10 pts	4-7 pts	0-3 pts
Comprehension	explains how the selected source of energy produces or generates energy (light, sound, heat, electricity) accurately	explains how the selected source of energy produces or generates energy with one to two unclear point/s	explains how the selected source of energy produces or generates energy with three or more unclear points
Delivery	the flow of thought is easy to understand shows confidence in delivering the explanation/ demonstration	the flow of thought has two to three unclear points confidence is somewhat evident in the delivery	the flow of thought is totally unclear does not show confidence in delivering the explanation
Audio and video quality	the video is clear, and its elements are distinguishable the audio is clear, or the sound dominates over the background noise creativity manifests in the vlog	the video is somewhat clear, and the elements are somewhat distinguishable the background noise interrupts half of the vlog few elements show creativity	the sound is inaudible, and the video elements are indistinguishable the background noise completely dominates the audio of the video no apparent creativity
