

Privacy Policy – Email Send Guard

Effective Date: 20th January 2026

Email Send Guard is designed with user privacy as a core principle. This extension performs all checks locally within the user's browser and does not collect, store, or transmit personal data.

Data Collection

Email Send Guard **does not collect user data**.

Specifically, the extension:

- Does **not** collect or store email content
- Does **not** collect or store email subject lines
- Does **not** collect or store attachments
- Does **not** collect or store recipient email addresses
- Does **not** collect browsing history or activity
- Does **not** collect identifiers, IP addresses, or device information

Data Processing

- Recipient and attachment checks (if applicable) are performed **locally and in real time** at the moment the user attempts to send an email.
- No data is logged, persisted, or sent to any external server.
- All logic runs entirely within the browser environment.

Data Sharing

Email Send Guard:

- Does **not** share data with third parties

- Does **not** transmit data to remote services
- Does **not** use analytics, tracking, or telemetry

Remote Code & External Services

- The extension does **not** load or execute remote code.
- No external APIs, scripts, or CDNs are used.

Permissions Usage

Permissions requested by the extension are strictly limited to enabling its single purpose: displaying a warning before an email is sent when potential misdelivery risks are detected. Permissions are not used for monitoring, tracking, or data collection.

Changes to This Policy

If the functionality of Email Send Guard changes in a way that affects data handling, this privacy policy will be updated accordingly.
