5,577 files

if any of these are yours and you want credit, please [message me!!](#) i'm not too active on tumblr, so mainly **instagram or twitter**. thank you [@lykaia](#)s for sending me this [google drive](#) to help me! 7/20/23

some images/gifs are not transparent, not all of these are gifs (all in the name!)

WEBP files may not work as gifs in carrds. or reentrys if they're just pngs. :)

if a gif *doesn't* work— save it and put it in this site: <https://ezgif.com/maker> when you are on the page with the layers, scroll to *above* “make a gif!” and look at “effects”, check off “don't stack frames” or it'll end up looking like this! 🍪

[big/medium](#) gifs are *roughly* 32x32-127x127-250+

[blinkies](#) have been randomly found on tumblr/people's carrds/reentrys but i might have made a few too!

no credit is/was needed <https://blinkies.cafe/>

sizes vary *a lot* in [specific characters](#)
(omori gifs are roughly 60x60+)

[symbols](#) are numbers, music notes, brackets, male/female signs, arrows, etc.

if you want to add a gif/image to reentry and you don't know how, i'd recommend sending the gif to a discord dm (it could be a bot/friend/alt account) and when you press share, copy the link and bam! "[name](imagelink) ***discord links aren't permanent***

<https://www.imghippo.com>

<https://imgbb.com>

upload image < "embed codes" < "HTML full link" < just keep "<https://i.ibb.co/>" gibberish + image name and it should work!

all gifs/images first word(s) is the colour(s), if you want a specific colour search for the colour with the magnifying glass (top right corner) or with any keywords (ex: cats, knives, anything you want, i tried!)

if you want to **recolour** an image/text import the *image* into ibispaint (or any drawing program), add a clipping layer of the colour, press the text that says "normal" and choose "colour" !! for gifs, you can use this site! <https://ezgif.com/instagif>

list of **colours** (alphabetical)

black 🐱

blue 🐱
