THE TITLE MUST BE CONCISE, INFORMATIVE, AND NO MORE THAN 16 WORDS (Cambria, 14, Capital Bold) (In Arabic Language tradisional Arabic 18, Bold)

First Author[1], Second Author[2], …, Last Author[xx] (Cambria, 11, Bold)
[1]First Affiliation, Country (Cambria, 10)
[2]Second Affiliation, Country (Cambria, 10)
[xx]Last Affiliation, Country (Cambria, 10)
[1]Corresponding Author: email address lead author

(length of article is **4000-8000 words** include bibliography, table, graphic)

***Abstract*:**	Abstract are written in 2 languages (English and Indonesian) or (Arabic and Indonesia), in 1 paragraph, distance of 1 point, and abstract lengths between 100-200 words. The purpose of abstract writing is to provide an overview to the reader about the contents of all articles which include; problem research, research methods and important results of research. In addition, abstract abstract writing must also be able to help the reader to read all or downloading the article (Cambria, 10). **الملخص:** يكتب الملخص باللغة العربية (In Arabic Language, tradisional arabic, 14)
***Keywords*:**	*3-5 keywords, separate with the semicolon (;) and alphabetical order*
Abstrak:	
***Kata Kunci*:**	

INTRODUCTION / PENDAHULUAN (does not allow subchapter)

The introduction contains the purpose of the study and why the study is conducted. The main section of an article should start with an introductory section which provides more details about the paper's purposes, motivation, research methods and findings. The introduction should be relatively nontechnical, yet clear enough for an informed reader to understand the manuscript's contribution.

In general, the article in *Lughotuna* is written in English, Arabic and Indonesian. The article also consists of 1 column, using "Cambria", font size 12, space 1,5 and tradisional Arabic 16, space 1. The reference only involves the citation. It employs in note citation (name, year), i.e. xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx (Wargadinata, 2020).

This template is designed to assist the author in preparing manuscript; it is an exact representation of the format expected by the editor. To use this template, please just *Save As* the MS Word file to the document, then copy and paste the document here. To copy and paste the text to this template document, please use "Special Paste" and choose "Unformated Text".

All papers submitted to the journal should be written in good English/Arabic/Indonesian. For the authors that their native language is not English are encouraged to have their English paper that is checked grammatically and clarity. English language and copyediting services can be provided by: International Editing and Asia Editing. The work should not have been published or submitted for free publication. The official language of the manuscript to be published in *Lughotuna* is English, Arabic and Indonesian.

In Introduction, Authors should state the objectives of the work at the end of introduction section. Before the objective, Authors should provide an adequate background, and brief literature survey in order to record the existing solutions / method, to show which is the best of previous researches, to show the main limitation of the previous researches, to show what is the achievement (to solve the limitation), and to show the scientific merit or novelties of the paper. Avoid a detailed literature survey or a summary of the results.

METHOD / METODE

Basically, this section describes the way the research was done. The main materials must be written here: (1) research design/type; (2) data and their resources; (3) data collection techniques; and (4) data analysis techniques.

RESULT AND DISCUSSION / HASIL DAN PEMBAHASAN

Results should be clear and concise. The results should summarize (scientific) findings rather than providing data in great detail. Highlight the differences between the results or findings and the previous publications by other researchers.

The discussion is the most significance section of the article. Make the discussion corresponding to the results, but do not reiterate the results. The following components should be covered in discussion: How do your results relate to the original question or objectives outlined in the Introduction section (what)? Do you provide interpretation scientifically for each of your results or findings presented (why)? Are your results consistent with what other investigators have reported (what else)? Or are there any differences?

The placement of the picture is like the Figure 1, i.e. is in the middle with the caption below is written in Cambria 9 font. The caption has to mention the title and the source of the picture.

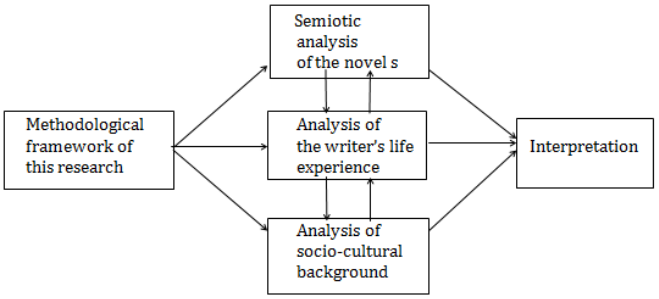

Figure 1. Analysis Diagram (Source: Sourcename, 2004)

Each table must be typed, and consecutively numbered, just like Table 1. The title is written above the table in Cambria 9 font, while the source is placed below the table in the same font.

After presenting the results, you are in a position to evaluate and interpret their implications, especially with respect to your original hypotheses. Here you will examine, interpret, and qualify the results and draw inferences and conclusions from them. Result and discussion should be presented in the same part, clearly and briefly. Discussion part should contain the benefit of research result, not repeat result part.

CONCLUSION / KESIMPULAN

Conclusions should answer the objectives of research. Tells how your work advances the field from the present state of knowledge. Without clear Conclusions, reviewers and readers will find it difficult to judge the work, and whether or not it merits publication in the journal. Do not repeat the Abstract, or just list experimental results. Provide a clear scientific justification for your work, and indicate possible applications and extensions. You should also suggest future experiments and/or point out those that are underway.
