Specializing in the understanding and development of up and coming web technologies, I am a skilled web developer who enjoys working to solve big problems. As a digital strategist, my expertise with online social patterns and the usage of interactive technologies allows me to provide value when developing strategies for customers.

Skills

- Skilled computer programmer in JavaScript , PHP, HTML and CSS
- Open to and currently expanding knowledge of Node, Python, Ruby and other programming tools and languages
- In depth knowledge of SEO, Analytics, UX, Social Media, Internet Marketing Technologies & Strategies and WordPress as a CMS

Experience

AMP Agency, Boston, MA: 2012 – Present
As a Web Developer at AMP Agency I am lead on a variety of development projects including the company's first mobile apps and adaptive websites. Charged with leading, inspiring and growing staff surrounding creative technology, I coordinate with strategists, creative directors, IA/UX, interactive producers, designers and digital production to expand our digital offerings and improve final deliverables. I also present regularly to both internal and external audiences to help educate, inspire and provide thought leadership on interactive technologies.

JonBishop.com, MA: 2006 – Present
As a freelance Web Developer and Digital Strategist I work with clients to build out and maintain their internet presence. Having worked with many content management systems, the area highly noted has been with WordPress. My WordPress plugins have been downloaded over 200,000 times. I also run the local WordPress meetup and speak in public often about WordPress, Web Development and Social Media.

HubSpot, Cambridge, MA: 2011 – 2012
Initially hired as a consultant to develop and maintain the HubSpot for WordPress plugin. The plugin was downloaded more than 10,000 times during the 11 months I worked on it. I was given complete creative control over the plugin's directions reporting directly to the VP of Engineering.

Human1, Cambridge, MA: 2010 – 2011
As a Web Developer I was responsible for developing new websites and maintaining existing client sites. I saw projects through from the front-end HTML/CSS/JS development to CMS integration and training.

Magicomm LLC, Amesbury, MA: 2007 – 2009
As the Technical Media Specialist I was lead developer and advisor on several integrated marketing campaigns involving variable data mailers and personalized landing pages. I also helped direct SEO and Social Media strategy as well as User Experience when working with creative.

Umass Amherst Computer Science Department, Amherst, MA: 2005 – 2007
As a Student Teacher I created and lectured on Flash animation, Web integration, and development fundamentals. I also worked as a Macromedia Flash Content Developer for the Computer Science department where I analyzed and commented out actionscript code.
