TEMPLATE FOR FULL PAPER FOR 4TH INTERNATIONAL CONFERENCE ON MEDIA AND SOCIAL SCIENCES (iCOMS 2025)

TITLE OF YOUR ARTICLE

(TIMES NEW ROMAN, 14 FONT SIZE, BOLD, ALL CAPS, CENTERED)

Author's Name and Surname[1], Author's Name and Surname[2*] (12 font size)
[1]Department/Faculty, University/Organisation, Country
[2] Department/Faculty, University/Organisation, Country
[*]E-mail: corresponding.author@uitm.edu.my

ABSTRACT

The abstract must report original and previously unpublished work. It should be written in English, and consist of 250 to 300 words. The abstract must be typed in Times New Roman font, size 12, justified alignment, with single line spacing. It should clearly outline the research objective or purpose, methodology, key findings, or expected outcomes, and the implications or significance of the study. If relevant, a brief mention of recommendations or directions for future research may be included. Please note that this is the template for full paper submission to iCOMS 2025. However, formatting requirements for the respective journals may differ, and authors will need to follow the journal's guidelines if their paper is selected for publication.

Keywords: *List up to 5 keywords, font size 10, Times New Roman font, Italicised*

1. INTRODUCTION

Type text with Times New Roman, font size 12, single spacing. The word count for the article must be between 5,000 – 7,000 words (excluding abstract, acknowledgment, biodata, references and appendix). The introduction should put the focus of the manuscript into a broader context. As you compose the introduction, think of readers who are not experts in this field. Include a brief review of the key literature. If there are relevant controversies or disagreements in the field, they should be mentioned so that a non-expert reader can find out about these issues further. The introduction should conclude with a brief statement of the overall aim of the experiments. Authors are responsible for the accuracy of the content of the references.

2. LITERATURE REVIEW

Subheadings are italicized and left-aligned

3. METHODOLOGY

This section should provide enough detail to allow full replication of the study by suitably skilled investigators. Protocols for new methods should be included, but well-established protocols may simply be referenced.

4. RESULTS AND DISCUSSION

The results section should provide details of all of the experiments that are required to support the conclusions of the paper. There is no specific word limit for this section. The section may be divided into subsections, each with a concise subheading. The results section should be written in past tense.

Tables must be cell-based without vertical lines. They should be produced in a spreadsheet program such as Microsoft Excel or in Microsoft Word. Type all text in tables using 9-point font on 10-points line spacing. Type the caption above the table to the same width as the table.

Tables should be numbered consecutively. Footnotes to tables should be typed below the table and should be referred to by superscript numbers. Submit separate files of tables in their original file format and not as graphic files in addition to incorporating in the main text. Tables should not duplicate results presented elsewhere in the manuscript (e.g., in graphs).

If figures are inserted into the main text, type figure captions below the figure. In addition, submit each figure individually as a separate file. Figures should be provided in a file format and resolution suitable for reproduction, e.g., EPS, JPEG or TIFF formats, without retouching. Photographs, charts and diagrams should be referred to as "Figure(s)" and should be numbered consecutively in the order to which they are referred.

The discussion should spell out the major conclusions of the work along with some explanation or speculation on the significance of these conclusions. How do the conclusions affect the existing assumptions and models in the field? How can future research build on these observations? What are the key experiments that must be done?

The discussion should be concise and tightly argued. Conclusions firmly established by the presented data, hypotheses supported by the presented data, and speculations suggested by the presented data should be clearly identified as such. The results and discussion may be combined into one section, if desired.

5. CONCLUSION

The Conclusion section restates the major findings and suggests further research.

6. ACKNOWLEDGEMENT (IF ANY)

People who contributed to the work but do not fit criteria for authorship should be listed in the Acknowledgments, along with their contributions. It is the authors' responsibility to ensure that anyone named in the acknowledgments agrees to being so named. The funding sources that have supported the work should be included in the acknowledgments.

7. BIODATA (not more than 50 words)

Ali bin Ali Baba is a senior lecturer at Universiti Teknologi Mara (UiTM), Malaysia. Email: ali@uitm.edu.my

8. REFERENCES

Please use 7th APA Format.
