How to play CBBN6:

Firstly get my patch from my Google Drive [here!](#)

To play CBBN6 all you need to do is extract the files for the patch within the patches folder in tango. so put the entire "bn6_CBBN6" folder in Tango/patches, as shown in the screenshot. It's already in a folder so right click the zip file then click on "extract here" is the quickest way. After you have added the patch you should be able to select this patch within tango and load up MMBN6 Falzar/Gregar with my patch applied! If you run into any issues feel free to DM me on discord @ldr100. A few screenshots below may help!
