PENDAHULUAN

The introduction must contain (in sequence) the general background, a review of previous literature (state of the art) as the basis for a statement of the scientific novelty of the article, a statement of scientific novelty, and the research problem or hypothesis. At the end of the introduction, the research objectives of the article must be written. In the scientific article format, it is not permitted to reflect on the literature as in research reports, but is realized in the form of a review of previous literature (state of the art) to show the scientific novelty of the article (empirical problems, theoretical problems, normative problems).

METODE PENELITIAN

The method explains how the research is conducted, including research design, data collection, research instrument and analytic methods. This part should be narrated

HASIL DAN PEMBAHASAN

Results and discussion contain research findings and discussion. Write down the findings obtained from the results of the research that has been carried out and must be supported by adequate data. Research results and findings must be able to answer the research questions or hypotheses in the introduction.

KESIMPULAN

The closing contains conclusions and suggestions. Conclusions describe the answer to the hypothesis and/or research objectives or findings obtained. The conclusion does not contain a repetition of the results and discussion, but rather a summary of the findings as expected in the objective or hypothesis. Suggestions present things that will be done related to further ideas from the research

DAFTAR PUSTAKA

All references referred to in the text of the article must be listed in the Bibliography section. The bibliography must contain reference libraries originating from primary sources (scientific journals and amounting to a minimum of 80% of the entire bibliography) published in the last 10 (ten) years.
